Baillie Gifford Global Alpha Growth Fund - Class B GBP Accumulation

Accumulation Shares - ISIN GB00B61DJ021

This Fund is a sub-fund of Baillie Gifford UK & Balanced Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to outperform (after deduction of costs) the MSCI ACWI Index, as stated in sterling, by at least 2% per annum over rolling five-year periods.

Policy

- The Fund will invest at least 90% in shares of companies anywhere in the world and in any sector.
- The Fund will be actively managed.

Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- Income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards
lower risk

Typically higher rewards
higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.
- The indicator does not take into account the following relevant material risks.
- The Fund is actively managed meaning the Investment Manager selects investments of their own choosing with the aim of achieving the Fund's objectives. This is done without seeking to replicate any index in either of performance or portfolio composition. This investment style, selecting companies with perceived greater long-term growth potential ahead of any short-term returns, in combination with the relative concentration of the Fund, may lead to prolonged periods of underperformance in certain market conditions, both in relation to the Fund's benchmark and in absolute terms.
- Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.
- In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.
- Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.
- You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.
- Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.
- For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.59%
Charges taken from the fund under certain specific conditions	
Performance fee	NONE

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charges, the figure is at 31/07/2025.
- Portfolio transaction costs, which are not included in the calculation of the ongoing charges figure but are incurred by the Fund when buying or selling investments, may have an impact on performance and are paid from the assets of the Fund.
- The Ongoing Charges Figure ('OCF') may be lower than previous declarations as a result of a revision to how the indirect fees associated with closed-ended investment companies need to be shown. This does not necessarily mean that fund expenses have gone down rather that we have reverted to how they were calculated until 30 June 2022 to reflect the revised Investment Association's Guidance on Disclosure of Fund Charges and Costs (July 2020, updated January 2022, revised November 2023). A more detailed Costs and Charges disclosure is available upon request.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- You can find further details about the charges in Part 5 of the Prospectus.

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

BlackRock ICS Sterling Liquidity Fund (the “Fund”), **Premier Accu GBP** (the “Share Class”), ISIN: **IE00B43FT809**, is authorised in Ireland and manufactured by BlackRock Asset Management Ireland Limited (the “Manager”) which is part of the BlackRock, Inc group.

The Manager is authorised in Ireland and regulated by the Central Bank of Ireland (the “CBI”) and the CBI is responsible for supervising the Manager in relation to this Key Information Document.

More information is available at www.blackrock.com or by calling +353 1 612 3393. This document is dated 09 April 2025.

What is this product?

Type: The Fund is a sub-fund of Institutional Cash Series plc, an umbrella company incorporated in Ireland, authorised by the Central Bank of Ireland as a Undertaking for Collective Investment in Transferable Securities (“UCITS”).

Term: The Fund does not have a fixed term of existence or maturity period but in certain circumstances, as described in the Fund prospectus, the Fund may be unilaterally terminated following written notice to unitholders subject to compliance with the Fund prospectus and applicable regulation.

Objectives

- The Fund aims to maximise income on your investment consistent with maintaining capital and ensuring its underlying assets can easily be bought or sold (in normal market conditions). Money invested in the Fund is not protected or guaranteed.
- The Fund invests in a broad range of high credit quality fixed income securities (such as bonds) and MMIs (i.e. debt securities with short term maturities). It may also invest in deposits with credit institutions (e.g. banks).
- The Fund will take into account environment, social and governance criteria when selecting investments as disclosed in the prospectus. For further details please refer to the prospectus.
- The Fund will limit its investment to assets which have 397 days or less remaining until the full principal must be repaid. The weighted average maturity (i.e. the average length of time to the date when the principal of the asset is to be repaid in full (or, in respect of interest rate notes, the average length of time to the next interest rate reset to a money market rate) of all of the Fund’s assets will be up to 60 days. The weighted average life (i.e. the average length of time to the date when the principal of the assets is to be repaid in full) of all of the Fund’s assets will be up to 120 days.
- The Fund’s assets may be issued or guaranteed by both United Kingdom (UK) and non-UK issuers including governments, government agencies, companies and supranationals and shall always be denominated in Sterling. They will be rated high credit quality (i.e. meet a specified level of credit worthiness) at the time of purchase.
- The Fund is actively managed. The investment manager has discretion to select the Fund’s investments. The Sterling Overnight Index Average Rate (SONIA) should be used by investors to compare the performance of the Fund.
- The Fund is a “Short Term Low Volatility Variable Net Asset Value Money Market Fund” (or LVNAV) as defined by the EU Money Market Funds Regulations. Details of the current credit ratings (if any) attributed to the Fund are available from www.blackrock.com/cash.
- The price of fixed income securities may be affected by changing interest rates which in turn may affect the value of your investment. Fixed income securities prices move inversely to interest rates. Therefore, the market value of fixed income securities may decrease as interest rates increase. The credit rating of an issuing entity will generally affect the yield that can be earned on fixed income securities; the better the credit rating the smaller the yield.
- The return on your investment in the Fund is directly related to the value of the underlying assets of the Fund, less costs (see “What are the costs?” below).
- The relationship between the return on your investment, how it is impacted and the period for which you hold your investment is considered below (see “How long should I hold it and can I take my money out early?”).
- The depositary of the Fund is J.P. Morgan SE – Dublin Branch.
- Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the Institutional Cash Series plc. These documents are available free of charge in English and certain other languages. These can be found, along with other (practical) information, including prices of units, on the BlackRock website at: www.blackrock.com or by calling the International Investor Servicing team on +353 1612 3393.
- Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- Your shares will be denominated in Sterling, the Fund’s base currency.
- You can buy and sell your shares daily. The Fund is valued at multiple valuation points throughout each day in order to offer investors the ability to buy and sell shares at multiple times during the day. The minimum initial investment for this share class is £500,000,000.

Intended retail investor: The Fund is intended for retail investors with the ability to bear losses up to the amount invested in the Fund (see “How long should I hold it and can I take my money out early?”).

Insurance benefits: The Fund does not offer any insurance benefits.

What are the risks and what could I get in return?

Risk Indicator

Lower risk Higher risk						
1	2	3	4	5	6	7
 The risk indicator assumes you keep the product for 1 year. The actual risk can vary significantly if you cash in at an early stage and you may get back less.						

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- We have classified this product as 1 out of 7, which is the lowest risk class. This classification rates the potential losses from future performance at a very low level, and poor market conditions could affect the value of your investment. This classification is not guaranteed and may change over time and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.
- Be aware of currency risk.** If you receive payments in a currency that is different to the product's base currency, the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
- Please refer to the product's Prospectus for details of other materially relevant risks that may apply to this product.
- This product does not include any protection from future market performance so you could lose some or all of your investment.
- If the product is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, which may include input from benchmark(s) / proxy, over the last ten years. Markets could develop very differently in the future.

What happens if BlackRock Asset Management Ireland Limited is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary, J.P. Morgan SE – Dublin Branch (the "Depositary"). In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). As a shareholder of the Fund you would not be able to make a claim to the UK Financial Services Compensation Scheme or any other scheme about the Fund in the event that the Fund is unable to pay out.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time: The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0 % annual return).
- GBP 10,000 is invested.

	If you exit after recommended holding period
Total costs	12 GBP
Cost impact (*)	0.1%

(*) This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

How long should I hold it and can I take money out early? Recommended Holding Period: 1 year

The recommended holding period (RHP) has been calculated in line with the investment strategy of the Fund and the time frame in which it is expected that it will be possible to achieve the investment objective of the Fund. Any investment should be considered against your specific investment needs and appetite for risk. BlackRock has not considered the suitability or appropriateness of this investment for your personal circumstances. If you are in any doubt about the suitability of the Fund to your needs you should seek appropriate professional advice. Details of dealing frequency can be found under "What is this product?". You may receive less than expected if you cash in earlier than the RHP. The RHP is an estimate and must not be taken as a guarantee or an indication of future performance, return or risk levels. Please see the "What are the costs?" section for details of any exit fees.

Product

Capital Group Global High Income Opportunities (LUX) (the "fund"), a sub-fund of Capital International Fund SICAV, Class Z GBP (LU0817815912)

The Commission de Surveillance du Secteur Financier ("CSSF") is responsible for supervising Capital International Management Company Sàrl (the "Manager"), part of Capital Group, in relation to this Key Information Document. The fund is authorised in Luxembourg. The Manager is authorised in Luxembourg and regulated by the CSSF. This document was published on 18/07/2025.

What is this product?

Type

This fund is a sub-fund of Capital International Fund, an open-ended Luxembourg SICAV (Société d'Investissement à Capital Variable), qualifying as a UCITS.

Term

This fund does not have a maturity date. The manufacturer is not entitled to terminate the fund unilaterally, however, as described in the fund's prospectus, liquidation of the fund may be approved by the board of directors of the company and/or by a resolution at a separate fund meeting of shareholders of the fund concerned.

Investment objective

To provide, over the long term, a high level of total return, of which a large component is current income. The fund invests primarily in emerging market bonds and corporate high yield bonds from around the world, denominated in USD and various national currencies (including emerging markets currencies). These are usually listed or traded on other regulated markets. Unlisted securities may also be purchased.

In addition to the integration of sustainability risks as part of the investment adviser's investment decision making process, the investment adviser aims to manage a carbon footprint lower than the fund's selected index level as specified in the prospectus.

The investment adviser also evaluates and applies ESG and norms-based screening to implement a negative screening policy relating to the fund's investments in corporate issuers and sovereign issuers. The fund may invest up to 10% in distressed securities. The fund's level of leverage is expected to be 75% of the net assets of the fund, as calculated using the sum of the notionals, not taking into account any netting of the derivatives and hedging arrangements that the fund has in place at any time. Under certain circumstances (e.g. very low market

volatility), the actual fund's level of leverage may increase from time to time to higher levels.

Intended retail investor

The fund is actively managed and particularly suitable for investors seeking:

- the potential for higher returns than traditional fixed income with less volatility than equities through investment primarily in corporate high yield bonds and government bonds of emerging markets; and
- to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR. As investments carry a risk of loss, an investor should have a basic knowledge of financial instruments to understand related risks, which are defined in the fund's 'What are the risks and what could I get in return?' section. The fund is appropriate for investors with a medium to long-term investment horizon and does not require prior experience with PRIIPs or similar investments.

This fund is an actively managed UCITS. It is not managed in reference to a benchmark. Any information in relation to an index is provided for the purposes of monitoring carbon emissions, risk management, context and illustration, as applicable.

Depositary

J.P. Morgan SE - Luxembourg Branch

Additional Information

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus). If you invest in a distributing share class, income from investments will be paid out to you. If you invest in an accumulating share class, income will be re-invested.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This figure rates the likelihood of losing money in the future, based on the Net Asset Value of this Share Class over the last ten years as a medium-low risk.

Be aware of currency risk. If you select a foreign currency share class, you will be exposed to currency risk, receive payments in a different currency to your local currency and your final return will depend on the exchange rate between these two currencies. This risk is not considered in the indicator shown above.

Investments in the fund are subject to general investment risks, such as market, counterparty and liquidity risks. Any specific risks to this fund are detailed in the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the fund over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		10,000 GBP	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment.		
Stress	What you might get back after costs	7,510 GBP	6,590 GBP
	Average return each year	-24.86%	-7.99%
Unfavourable	What you might get back after costs	9,280 GBP	10,700 GBP
	Average return each year	-7.17%	1.36%
Moderate	What you might get back after costs	10,380 GBP	11,880 GBP
	Average return each year	3.83%	3.50%
Favourable	What you might get back after costs	14,400 GBP	17,460 GBP
	Average return each year	43.99%	11.79%

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable scenario: this type of scenario occurred for an investment between April 2017 and April 2018.

Moderate scenario: this type of scenario occurred for an investment between May 2019 and May 2020.

Favourable scenario: this type of scenario occurred for an investment between February 2016 and February 2017.

What happens if Capital International Management Company Sàrl is unable to pay out?

The fund's assets are held in safekeeping by its depositary, J.P. Morgan SE, Luxembourg Branch (the 'Depositary'). In the event of the insolvency of the Manager, the fund's assets in the safekeeping of the Depositary will not be affected. In the event of the Depositary's insolvency, the fund may suffer a financial loss. However, this risk is mitigated to some extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the fund. Your investment is not covered by the Luxembourg compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and they will affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10 000.00 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	89 GBP	446 GBP
Annual cost impact (*)	0.9%	0.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.4% before costs and 3.5% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	This includes distribution costs of 5.25%. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to 525 GBP
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 GBP
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.8% of the value of your investment per year. This is an estimate based on actual costs.	75 GBP
Transaction costs	0.1% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	14 GBP
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 GBP

Different costs apply depending on the investment amount. This illustrates costs in relation to the notional value of the fund.

How long should I hold it and can I take money out early?

This fund has been created for long term investment and the recommended minimum holding period is 5 years. There will be no penalty should you choose to redeem your investment at any time prior to this. Investors are advised to make an assessment on their specific investment aims and appetite for risk.

How can I complain?

Should you wish to complain about the fund or any aspect of the service provided to you by the Manager, you should write to the Complaints Officer, Capital International Management Company Sàrl, 37A, avenue John F. Kennedy, L-1844 Luxembourg. Alternatively, you can submit your complaint via the email address Client_Operations@capgroup.com. Please also consult our website, www.capitalgroup.com for the steps to be followed for making a complaint.

This includes countries considered to be emerging markets as determined by the investment manager at its sole discretion. The companies will be either listed, incorporated, domiciled, or have significant business activities in the region. The remainder will be invested in companies outside of the region detailed above and in other investment types such as cash and derivatives.

Emerging markets are countries progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.

Investment Process: The fund is actively managed. The Investment Manager identifies suitable opportunities for the fund utilising in-house research and investment capabilities. The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, consider the MSCI Emerging Markets (Net Total Return) Index. The Investment Manager has a wide degree of freedom relative to the index and may take larger, or smaller, positions in companies, and/or may invest outside the index, to take advantage of investment opportunities. This means the fund's investments and therefore performance may vary significantly from the index.

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.

Additional information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund. The fund's performance can be compared to the MSCI Emerging Markets (Net total return) Index.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high. Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner. Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses. In some emerging markets, such as Russia, the safekeeping provisions for securities benefit from less governed standards.

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing charges	0.95%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses for the year ending 30/06/2024. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 28 July 1997. This class was launched on 13 May 2013.

Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '**' in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Investment Objective section shall refer to a benchmark and information on previous benchmarks may be found in the Annual Report and Accounts. This Class was previously the Accumulation Class of the fund.

Fidelity Index US Fund

a sub-fund of Fidelity Investment Funds

Fidelity Index US Fund P Accumulation Shares

(ISIN:GB00BJS8SH10)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

Objective: The fund aims to track the performance (before fees and expenses are applied) of the S&P 500 (NUK) Index, thereby seeking to increase the value of your investment over 5 years or more.

Investment Policy: The fund uses an index tracking (passive) investment approach whereby it aims to replicate the composition of the index. However, for practical reasons and/or to reduce the dealing costs of the fund, it may not invest in every company share in the index or at its weighting within the index.

Investment Process : As well as investing directly in company shares, the fund will achieve exposure indirectly using derivatives, for example at the time of cash inflows to remain fully invested or to reduce transaction costs. To manage the cash position, the fund may invest in other investment types such as liquidity funds (including those managed by Fidelity).

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.

For hedged share classes, currency hedging is used to substantially reduce the risk of losses from unfavourable exchange rate movements. Currency look-through hedging is used to hedge the underlying currency effects at the security level to that of the hedged share class reference currency, thereby delivering the underlying market returns.

Additional information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund. The fund's performance can be compared to the S&P 500 NUK Index hedged to GBP. This index is calculated net of 15% withholding tax to better align to the fund's withholding tax treatment.

The S&P 500 index is a product of S&P Dow Jones Indices LLC and has been licensed to FIL Investment Management Limited ("FIL"). The Fidelity Index US Fund is not sponsored, endorsed, sold, or promoted by S&P Dow Jones Indices LLC or its affiliates and neither S&P Dow Jones Indices LLC, its affiliates, or their respective third party licensors make any representation regarding the advisability of investing in such product. S&P 500® is a registered trademark of Standard & Poor's Financial Services LLC and has been licensed to FIL. NUK means Net Total Return (WHT 15%). NUK is a customised index variant, designed and maintained by S&P, which aligns more closely with this fund's withholding tax treatment.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average. Fidelity International's partial swing pricing policy can cause differences in the fund's performance versus the index. A fund's performance tracking may be affected if the times at which a fund and its benchmark index are priced are different. The fund is priced at midday UK time, and the index is priced when the relevant stock markets close. This can cause apparent differences in the fund's performance versus that of the index than if the fund and the index were priced at the same time.

iShares Continental European Equity Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00B83MH186

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE World Europe ex UK Index, the Fund's benchmark index.
- ▶ The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index.
- ▶ The benchmark index measures the performance of equity securities of leading companies listed in Europe, excluding the United Kingdom. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- ▶ The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so will take into consideration the benchmark index.
- ▶ The Fund intends to replicate the benchmark index by holding the equity securities, which make up the benchmark index, in similar proportions to the benchmark index.
- ▶ The Fund may also engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 30 June 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest

- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

For an explanation of some of the terms used in this document, please visit the glossary on our website at <https://am.jpmorgan.com/gb/en/asset-management/per/funds/administrative-information/>.

Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its Net Asset Value has shown medium to high fluctuations historically.

OTHER MATERIAL RISKS

The Fund is subject to **Investment risks** and **Other associated risks** from the techniques and securities it uses to seek to achieve its objective.

The table on the right explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Fund.

Investors should also read [Risk Descriptions](#) in the Prospectus for a full description of each risk.

Investment risks Risks from the Fund's techniques and securities

Legal & General All Stocks Gilt Index Trust Unit Class I GBP Accumulation - ISIN: GB00B8344798

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE Actuaries UK Conventional Gilts All Stocks Index, the "**Benchmark Index**" before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
 - The Benchmark Index comprises government or other public bonds (a type of loan that pays interest) issued by the government of the United Kingdom (known as gilts) in accordance with the index provider's methodology.
 - The gilts that the Fund invests in will be investment grade bonds (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index.
 - The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.
 - The Fund may also invest in government or other public bonds issued by the government of the United Kingdom which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index, money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Manager may only hold money market instruments and deposits for liquidity purposes to facilitate the redemption of units and the efficient management of the Fund.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Benchmark Index.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in GBP.
 - This Fund may be suitable for investors looking to invest in bonds issued by the UK government (known as gilts), as represented by the Benchmark Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 4 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The price for buying and selling units is subject to a Dilution Adjustment See opposite.	
Charges taken from the fund over each year	
Ongoing charge	0.15%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2024. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken partly from the income and partly from the capital of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.04% for purchases and 0.04% for sales at 31 December 2024. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1981.
- This unit class launched in 2012.

PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Investor Services Limited.
- You can obtain further information about the Fund including copies of its prospectus and the latest annual and semi-annual reports at www.legalandgeneral.com/reports. Paper copies of these documents are also available free of charge in English from Legal & General Investments, PO Box 6080, Wolverhampton WV1 9RB.

Legal & General Cash Trust
Unit Class I GBP Accumulation - ISIN: GB00B0CNHB64
 The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of this Fund is to maintain capital and to provide a return in line with money market rates, before charges.
 - The Fund will generally invest in short term deposits, certificates of deposit, government bonds (predominantly UK) issued in pounds sterling (a type of loan that pays interest) and Repos. Repos are an agreement between two parties to sell or buy an asset and later reverse the trade at an agreed date and price.
 - Where the Manager considers it appropriate, for example, in times of market stress, the Fund may be significantly invested in government and public securities.
 - The maximum maturity of the instruments the Fund invests in is 397 days but the Fund must maintain a weighted average maturity of less than 60 days.
 - The bonds that the Fund invests in must be investment grade (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- The Fund is actively managed as the Manager uses their expertise to select investments to achieve the Fund's objective.
 - The Fund is a short-term variable net asset value money market fund.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in GBP.
 - The IA Short Term Money Market is a benchmark which is used as a performance comparator of the Fund. See the Past Performance section for further details.
 - The Fund is a short-term variable net asset value money market fund.
 - This Fund is designed for investors looking to preserve their money from an investment in deposits and short term instruments.
 - This Fund may be appropriate for investors looking to invest for a short period of time.
 - This Fund may be appropriate for investors looking to invest for a short period of time.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

- The Fund is in category 1 as it invests in instruments which are very liquid, have short maturities which have a high credit rating and are considered lower risk than longer maturing securities.
- Even a fund in the lowest category is not a risk free investment.
- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; and the investor may get back less than the original amount invested.

Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports. The risk and reward indicator may not take account of the following risks of investing in the Fund:

- When interest rates are low or negative and if the Fund's income is not enough to pay the charges, the Fund's capital will be used instead. This may cause capital erosion and the value of the Fund to fall. Where interest rates are negative, you may not receive interest payments and the value of your Fund may decrease.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- The Fund has money on deposit with companies such as banks or other financial institutions and invests in bonds which are issued by the government. PAST PERFORMANCE

*Performance prior to this point achieved under circumstances that no longer apply

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1992.
- This unit class launched in 2005.
- To assess the performance of the Fund, it can be compared to the IA sector, Short Term Money Market (referred to as the "Comparator" in the chart opposite).
- On 28 April 2016*, the Fund changed its investment objective and policy. Prior to this date, the Fund used a different comparator which is reflected in the benchmark data.

Future World Global Multi-Factor ESG Tilted and Optimised Index Fund Unit Class I GBP Accumulation - ISIN: GB00BF41Q726

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the iSTOXX L&G Global Multi-Factor ESG Index, the "Benchmark Index", on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Fund seeks to replicate the Benchmark Index as closely as possible and will have at least 90% exposure to its constituents and will generally hold assets directly but can use depositary receipts (such as American the direct asset cannot be held or is not available).
- The Fund may also invest in shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index.
- The Fund may also invest in money market instruments (including treasury bills), depositary receipts, cash, deposits, and collective investment schemes including those managed or operated by the Manager or an associate of the Manager.
- The Fund may also exclude companies listed on LGIM's Climate Impact Pledge divestment list. This list includes companies, which after certain period of engagement, continue to: (i) not perform well against LGIM's climate assessment; (ii) are unresponsive to engagement recommendations; and/or; fall behind in meeting LGIM's minimum standards. If the tracking deviation limit is exceeded, holdings of companies that are on the Climate Impact Pledge divestment list may be reduced rather than fully divested. www.lgim.com/climate-impact-pledge.
- The Benchmark Index is designed to reflect the performance of a global and diversified regional basket of companies where their weights are varied to achieve balanced multi-factor exposures to: value, momentum, quality, low volatility and size. Each company in the Benchmark Index is scored on each of the above factors and these scores are combined into a single multi-factor score.
- The Benchmark Index tilts to increase exposure to companies that demonstrate good environmental, social and governance ("ESG") efforts as determined by the Investment Manager's proprietary ESG scoring system ("ESG Scores"). The ESG Score is used as a rules-based approach to scoring companies. On average, the Benchmark Index aims to have a 5% improvement over the total aggregate ESG score compared to the Parent Index.
- Parent Index is defined in the Benchmark Index methodology. The Parent Index is a representation of the broader investment universe before ESG criteria and factors characteristics are taken into consideration by the Benchmark Index provider.
- This means the Fund will invest more in companies with higher ESG Scores, and less in companies with lower ESG Scores. Higher scores indicate more of the Investment Manager's criteria for best practices have been met. Due to data limitations, the Investment Manager may not be able to calculate an ESG score for all companies in the Benchmark Index. In such cases companies will be given a neutral weighting and no tilting based on the **ESG Scores**.
- The Benchmark Index aims to reduce its overall greenhouse gas (GHG) emissions intensity in line with a reduction pathway of 7% per year on average, starting from April 2021 ("Index Base Date"). It also aims to keep its GHG emissions intensity at least 50% lower than the Parent Index. At each Benchmark Index rebalance, the lower value of these two metrics is

used in the optimisation process. The Benchmark Index will be rebalanced on a quarterly basis.

- The Benchmark Index excludes companies on LGIM's Future World Protection List ("FWPL"). This list seeks to align with market practice and client expectations for responsible investment products. Companies on the FWPL include companies considered as perennial violators of the United Nations Global Compact, certain companies involved in the manufacture and production of controversial weapons, certain companies with involvement in mining and FWPL methodology sets out the Investment Manager's various assessment criteria, including revenue thresholds. www.lgim.com/fwpl.
- The Fund does not apply a UK sustainability investment label in accordance with the FCA's Sustainability Disclosure Requirements. The Fund's Consumer Facing Disclosure, a document which includes details of the key sustainability characteristics and the sustainability metrics for the Fund, can be found on the Manager's website from 2 December 2024.
- An overview of the Benchmark Index is available on STOXX's website: <https://stoxx.com/index/swgmegv>.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.

Other information:

- The Fund is passively managed as it tracks the Benchmark Index, less those excluded by the Climate Impact Pledge and Future World Protection List.
- Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3pm. This is the time we calculate unit prices for this Fund. If you contact us after 3pm, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in GBP.
- The Fund is passively managed as it tracks the Benchmark Index.
- This Fund may be suitable for investors looking to track the shares in companies that score high in value, momentum, quality, low volatility and size and greater exposure to ESG criteria, as represented by the Benchmark Index.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

Lower Risk ← Higher Risk
Potentially lower rewards Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- Even a fund in the lowest category is not a risk free investment.
- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; and the investor may get back less than the original amount invested.

Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund invests directly or indirectly in smaller companies. Investments in smaller companies tend to be riskier than investments in larger companies because they can: (i) be harder to buy and sell; or (ii) go up and down in value more often and by larger amounts, especially in the short-term. In

times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for the Fund to sell investments and the Manager may defer withdrawals, or suspend dealing. The Manager can only delay paying out if it is in the interests of all investors and with the permission of the Fund trustee or depositary.

times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for the Fund to sell investments and the Manager may defer withdrawals, or suspend dealing. The Manager can only delay paying out if it is in the interests of all investors and with the permission of the Fund trustee or depositary.

- The Fund may invest in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: (i) may not be as well regulated; (ii) may be more difficult to buy and sell; (iii) may have less reliable arrangements for the safekeeping of investments; or (iv) may be more exposed to political and taxation uncertainties. The value of the Fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short-term.
- The Fund has a sustainability and/or ESG focus in its investment process which may i) limit the Fund's exposure to or exclude certain companies, industries or sectors ii) impact the Fund's investment performance compared to other funds that do not apply such criteria and, iii) differ from an investor's own sustainability and/or ESG criteria.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- Where companies in the Index are excluded from the Fund as a result of the Climate Impact Pledge, this may affect the ability of the manager to closely track the performance of the Index.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The price for buying and selling units is subject to a Dilution Adjustment See opposite.	
Charges taken from the fund over each year	
Ongoing charge	0.30%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2024. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the Income of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.12% for purchases and 0.08% for sales at 31 December 2024. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2018.
- This unit class launched in 2018.

Legal & General Future World ESG Tilted and Optimised Developed Index Fund Unit Class I GBP Accumulation – ISIN: GB00BYWQWW93

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the Solactive L&G Enhanced ESG Developed Markets Index NTR, the "Benchmark Index" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Fund seeks to replicate the Benchmark Index as closely as possible and will have at least 90% exposure to its constituents and will generally hold assets directly but can use depositary receipts (such as American depositary receipts and global depositary receipts) to gain exposure when the direct asset cannot be held or is not available.
- The Fund may also invest in shares in companies (directly or indirectly) which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index.
- The Fund may also invest in, money market instruments (including treasury bills), depositary receipts, cash, deposits, and collective investment schemes including those managed or operated by the Manager or an associate of the Manager.
- The Fund may also exclude companies listed on LGIM's Climate Impact Pledge divestment list. This list includes companies, which after certain period of engagement, continue to: (i) not perform well against LGIM's climate assessment; (ii) are unresponsive to engagement recommendations; and/or; fall behind in meeting LGIM's minimum standards. If the tracking deviation limit is exceeded, holdings of companies that are on the Climate Impact Pledge divestment list may be reduced rather than fully divested www.lgim.com/climate-impact-pledge.
- The Benchmark Index is comprised of shares in companies that are incorporated, headquartered or which have their principal business activities in developed countries.
- The Benchmark Index tilts to increase exposure to companies that demonstrate good environmental, social and governance ("ESG") efforts as determined by the Investment Manager's proprietary ESG scoring system ("ESG Scores"). The ESG Score is used as a rules-based approach to scoring companies.
- This means the Fund will invest more in companies with higher ESG Scores, and less in companies with lower ESG Scores. Higher scores indicate more of the Investment Manager's criteria for best practices have been met. Due to data limitations, the Investment Manager may not be able to calculate an ESG score for all companies in the Benchmark Index. In such cases companies will be given a neutral weighting and no tilting based on the ESG Score will be applied. **LGIM ESG Scores**.
- The Benchmark Index aims to reduce its overall greenhouse gases (GHG) emissions intensity in line with a reduction pathway of 7% per year on average, starting from April 2021 ("Index Base Date"). It also aims to keep its GHG Emissions Intensity at least 50% lower than the Parent Index. At each Benchmark Index rebalance, the lower value of these two metrics is used in the optimisation process.
- The Benchmark Index excludes companies on LGIM's Future World Protection List ("FWPL"). This list seeks to align with market practice and client expectations for responsible investment products. Companies on the

FWPL include companies considered as perennial violators of the United Nations Global Compact, certain companies involved in the manufacture and production of controversial weapons, certain companies with involvement in mining and extraction of thermal coal, thermal coal power generation or oil sands, which have not set out a clear plan aligned with the Paris Agreement to phase out thermal coal in accordance with specific criteria. The FWPL methodology sets out the Investment Manager's various assessment criteria, including revenue thresholds. www.lgim.com/fwpl

- The Benchmark Index also excludes companies generating certain levels of revenue from firearms, military weapon system manufacturing, tobacco (both from distribution and production), thermal coal power generation and extraction, adult entertainment (both from production and distribution) and gambling (includes certain supporting products and services to gambling operations) as defined by the Benchmark Index provider.
- The Benchmark Index will be rebalanced twice a year.
- The Fund does not apply a UK sustainability investment label in accordance with the FCA's Sustainability Disclosure Requirements.
- The Fund's Consumer Facing Disclosure, a document which includes details of the key sustainability characteristics and the sustainability metrics for the Fund, can be found on the Manager's website. An up-to-date overview of the Benchmark Index's methodology is available on www.lgim.com/climate-impact-pledge.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.

Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
- Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3pm. This is the time we calculate unit prices for this Fund. If you contact us after 3pm, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in GBP.
- This Fund is designed for investors looking to invest more in shares in companies that demonstrate good environmental, social and governance efforts in developed countries, as represented by the Benchmark Index.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within 5 years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

Legal & General Global Infrastructure Index Fund Unit Class I GBP Accumulation - ISIN: GB00BF0TZG22

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE Global Core Infrastructure Index, the "Benchmark Index" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
 - The Benchmark Index is comprised of shares in companies with infrastructure core activities in accordance with the index provider's methodology.
 - The Fund seeks to replicate the Benchmark Index and its investments will closely match those that make up the Benchmark Index.
 - The Fund will have at least 90% exposure (directly or through depositary receipts (a certificate issued by a bank representing shares in a foreign company such as American depositary receipts and global depositary receipts)) to assets that are included in the Benchmark Index.

 - Even a fund in the lowest category is not a risk free investment.
 - The value of an investment and any income taken from it is not guaranteed and can go down as well as up; and the investor may get back less than the original amount invested.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports. The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund may invest in countries where investment markets are considered

- to be less developed. This means that investments are generally riskier than those in developed markets because they: (i) may not be as well regulated; (ii) may be more difficult to buy and sell; (iii) may have less reliable arrangements for the safekeeping of investments; or (iv) may be more exposed to political and taxation uncertainties. The value of the Fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short-term.
- Most of the Fund holds investments from a particular market sector, that of companies within the infrastructure industry. Funds like this can be more volatile than funds that invest across many market sectors. This is because the value of the Fund can go up and down more often and by larger amounts than funds that are spread more widely, especially in the short-term.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The price for buying and selling units is subject to a Dilution Adjustment See opposite.	
Charges taken from the fund over each year	
Ongoing charge	0.30%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2024. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the Income of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.11% for purchases and 0.09% for sales at 31 December 2024. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2018.
- This unit class launched in 2018.

PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Investor Services Limited.

Legal & General Short Dated Sterling Corporate Bond Index Fund Unit Class I GBP Accumulation - ISIN: GB00BKGR3H21

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the Markit iBoxx GBP Corporates 1-5 Index, the "Benchmark Index" before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
 - The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index. The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.
 - The Benchmark Index is comprised of investment grade corporate bonds (a type of loan that pays interest) that are short dated (i.e. up to 5 years in maturity) and denominated in sterling (British Pound).
 - The bonds that the Fund invests in will be primarily investment grade (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - The Fund may also invest in money market instruments (such as treasury bills), cash, deposits, bonds which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Benchmark Index.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in GBP.
 - This Fund may be suitable for investors looking to track the market in investment grade corporate bonds that are short dated and denominated in British Pounds as represented by the Benchmark Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 3 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

M&G Corporate Bond Fund

a sub-fund of M&G Investment Funds (3)
Sterling Class I – Accumulation shares ISIN no. GB00B1YBRL59
Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, higher than the average return of the iBoxx Sterling Corporates GBP Index over any five-year period.

Core investment: At least 70% of the fund is invested, directly or through derivatives, in investment grade bonds and investment grade asset-backed securities, issued by companies from anywhere in the world, including emerging markets. These bonds are denominated in sterling or hedged back to sterling.

Other investments: The fund may invest in government bonds, high yield bonds, high yield asset-backed securities, other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly. Investments in asset-backed securities are limited to 20% of the fund.

Derivatives usage: For investment purposes and to reduce risk and cost.

Strategy in brief: The fund manager selects investments based on an assessment of macroeconomic, asset, sector, geographic and stock-level factors. Spreading investments across issuers and industries is an essential element of the strategy.

Benchmark: iBoxx Sterling Corporates GBP Index

The benchmark is a target which the Fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the Fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction. The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. For performance measurement purposes the benchmark is shown or hedged into the relevant share class currency.

Additional information can be found on the M&G website, including:

- a [glossary](#) providing an explanation of some terms used in this document.
- the Prospectus including the fund's objective and investment policy.

Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

■ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 4 because its Net Asset Value has shown medium rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

■ High yield bonds usually carry greater risk that the bond issuers may not be able to pay interest or return the capital.

■ The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

■ Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

The fund is exposed to different currencies. Derivatives are used to minimise, but may not always eliminate, the impact of movements in currency exchange rates.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ During periods of sustained low interest rates, it might be difficult for the fund manager to achieve their stated investment objective net of charges.

■ Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.43%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the period/year ending 30 June 2024. This figure may change from year to year. It excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Annual Charge which may be discounted depending on the size of the fund. The Annual Charge without any discount is 0.45%. The fund's annual report for each financial year will include details on the exact charges made.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature

Past performance

- Past performance is not a guide to future performance.
- Performance calculation excludes UK taxes from 01 January 2017. It does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the charges section.
- The fund launched on 15 April 1994 and the Sterling Class I Accumulation share class launched on 02 July 2007.
- Performance is calculated using Sterling Class I Accumulation shares.
- Benchmark performance has been calculated in GBP.
- With effect from 6th March 2023 the benchmark will be the iBoxx Sterling Corporates GBP Index.

Practical information

M&G Emerging Markets Bond Fund

a sub-fund of M&G Investment Funds (3)

Sterling Class I – Accumulation shares ISIN no. GB00B7GNKY53

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, higher than that of a composite index over any five-year period.

The composite index is 1/3 JPM EMBI Global Diversified Index, 1/3 JPM CEMBI Broad Diversified Index and 1/3 JPM GBI-EM Global Diversified Index.

Core investment: At least 80% of the fund is invested, directly or through derivatives, in bonds issued by the governments, government-related institutions or companies of emerging markets. These bonds can be denominated in any currency, including emerging market currencies. The fund invests in bonds of any credit quality and may invest up to 100% in high yield bonds.

Other investments: The fund may invest in asset-backed securities, other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: For investment purposes and to reduce risk and cost.

Strategy in brief: The fund manager selects investments based on an assessment of global, regional, and country-specific macroeconomic factors, followed by indepth analysis of individual bond issuers. The fund is diversified by investing in a range of bonds across emerging markets.

Benchmark: A composite index comprising:

- 1/3 JPM EMBI Global Diversified Index
- 1/3 JPM CEMBI Broad Diversified Index
- 1/3 JPM GBI-EM Global Diversified Index

The benchmark is a target which the fund seeks to outperform. The composite index has been chosen as the benchmark as it best reflects the scope of the fund's investment policy. The benchmark does not constrain portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

For performance measurement purposes the benchmark is shown or hedged into the relevant share class currency.

Additional information can be found on the M&G website, including:

- a [glossary](#) providing an explanation of some terms used in this document.
- the Prospectus including the fund's objective and investment policy.

Other information

The fund may invest more than 35% in securities issued or guaranteed by a member state of the European Economic Area or other countries listed in the fund's Prospectus. This investment may be combined with the use of derivatives in pursuit of the fund's investment objective.

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

■ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 4 because its Net Asset Value has shown medium rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

■ Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

■ The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

■ The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.

Type

This product is a UCITS sub-fund of a variable capital umbrella investment company with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended.

Subject to the conditions set down in the prospectus, shareholders may exchange all or part of their shares of this fund for shares of another fund of the company. Please refer to the section entitled "How To Exchange Shares" in the prospectus for further details.

Term

This product has no fixed term.

Objectives

The fund aims to maximise the total return on your investment through primarily investing in a diversified portfolio of high yield fixed income instruments and securities that are denominated in major world currencies, using prudent investment management principles.

Investment Policy

The fund aims to achieve its objective by taking exposure to a diversified range of "high yield" fixed income securities and instruments (which are similar to loans that pay a fixed or variable rate of interest) issued by companies from around the world. The fund will mainly invest in "non-investment grade" securities. These are generally considered to be riskier investments than "investment grade" securities, but typically may produce a higher level of income.

The fund is considered to be actively managed in reference to the ICE BofAML BB-B Rated Developed Markets High Yield Constrained Index (the "Index") by virtue of the fact that the Index is used for duration measurement, calculating the global exposure of the fund using the

relative VaR methodology and for performance comparison purposes. Certain of the fund's securities may be components of and may have similar weightings to the Index. However, the Index is not used to define the portfolio composition of the fund or as a performance target and the fund may be wholly invested in securities which are not constituents of the Index.

The average portfolio duration of the fund will normally vary within two years (plus or minus) of the Index. Duration measures the sensitivity of the assets to interest rate risk. The longer the duration the higher the sensitivity to changes in interest rates.

Investments may be linked to emerging market countries, which in investment terms are those economies that are not as developed.

The fund may invest in derivative instruments (such as futures, options and swaps) rather than directly in the underlying securities themselves. The derivatives return is linked to movements in the underlying assets.

The assets held by the fund may be denominated in a wide variety of currencies with non-USD currency exposure limited to 20% of total assets. The investment advisor may use foreign exchange and related derivative instruments to hedge or implement currency positions.

Dealing Day Shares in the fund can normally be redeemed on a daily basis. Please refer to the section entitled "How to Redeem Shares" in the prospectus.

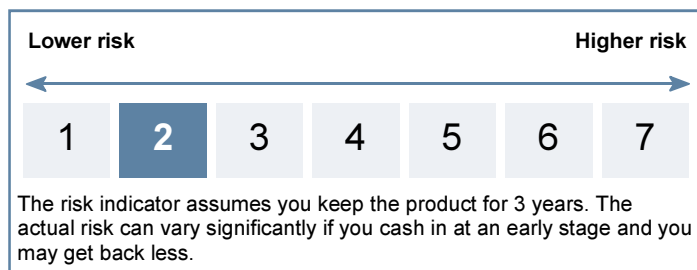

Distribution Policy This share class does not pay out a distribution. Any investment income generated will be reinvested.

Intended retail investor

Typical investors in the Fund will be investors who are looking to maximise total return through a combination of both income and capital growth and are looking for a diversified exposure to high yield global fixed income markets and are willing to accept the risks and volatility associated with investing in such markets and who have an investment horizon over the medium to long term.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This classification is subject to change over time.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level and poor market conditions are very unlikely to impact the value of your investment.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not covered by the risk indicator include Credit and Default Risk, Interest Rate Risk and Liquidity Risk. For a full list of risks, please refer to the fund's prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund or benchmark over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances.

What happens if PIMCO Global Advisors (Ireland) Limited is unable to pay out?

As a collective investment scheme that has engaged an independent depositary to perform safekeeping and ownership verification duties on its assets in accordance with EU law, your investment is not exposed to the credit risk of PIMCO Global Advisors (Ireland) Limited. Nonetheless you may face financial loss should PIMCO Global Advisors (Ireland) Limited or the depositary, State Street Custodial Services (Ireland) Limited default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario.

Investment: GBP 10,000	If you exit after 1 year	If you exit after 3 years
Total costs	79 GBP	255 GBP
Annual cost impact (*)	0.8%	0.8%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.0% before costs and 3.2% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less.	0 GBP

Royal London Short Duration Credit Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Bond Funds II ICVC ISIN: GB00BJ4KW792

Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund aims to provide a return greater than that of the ICE Bank of America Merrill Lynch 1-5 Year Sterling Non-Gilt Total Return Index over rolling 3-year periods, through a combination of capital growth and income, after the deduction of charges.

Policy At least 80% of the Fund is invested in corporate bonds, supranational bonds, agency bonds, floating-rate notes and asset-backed securities which are denominated in sterling or hedged back to sterling. Within this segment, 70% have a duration of less than five years.

The remainder of the Fund (up to 20%) may be invested in UK government bonds and also corporate bonds, supranational bonds, agency bonds and government bonds that are denominated in a currency other than sterling, transferable securities (including preference shares) and money market instruments.

Up to 10% of the Fund may be invested in other funds known as collective investment schemes (including funds managed by Royal London Unit Trust Managers Limited or another Royal London Group company).

The Fund may use derivatives for the purposes of Efficient Portfolio Management (including hedging). The use of derivatives for this purpose is unlikely to increase the risk profile of the Fund.

Cash may be held for investment purposes and to manage inflows and outflows of investors' money in the Fund, however cash is not expected to exceed 5% of the Fund.

Strategy The Fund is actively managed, meaning the Investment Manager uses its expertise to select investments to meet the objective.

Benchmarks The target benchmark is ICE Bank of America Merrill Lynch 1-5 Year Sterling Non-Gilt Total Return Index (the "Index") which represents a range of short-dated sterling denominated bonds, not including those issued by the UK government.

The Index has been selected as a target benchmark because it is representative of the type of bonds in which the Fund invests, and it is therefore an appropriate measure for the Fund's performance.

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Concepts to understand

Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Total Return A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

Rolling 5 Year Period A rolling 5-year period is any period of five years, no matter which day you start on.

Duration is an investment's sensitivity to interest-rate changes measured in years.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 3 because its simulated price has shown a medium to low level of volatility historically. The Fund was formed by merger and the SRRI was calculated using historic data from the merging fund and may not be a reliable indicator of the future risk profile of the fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit Risk Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges from Capital Risk Charges are taken from the capital of the Fund. Whilst this increases the yield, it also has the effect of reducing the potential for capital growth.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year:	
Ongoing charge	0.35%
Charges taken from the fund under specific conditions:	
Performance fee	None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. The ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The Fund was launched on 12 April 2019 and the share class on 12 April 2019. The Fund was formed by a merger on 12 April 2019. The performance shown below is that of the merging fund. The merging fund had the same investment objectives and policy as this fund.

Past performance is not a guide to future performance and may not be repeated. The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance. The past performance is calculated in British Pounds, with net dividends reinvested.

Schroder Sustainable Multi-Factor Equity Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited
Class I Accumulation GBP (GB00BF785732)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the MSCI All Countries World (Net Total Return) index (after fees have been deducted) over a three to five year period by investing in equities of companies worldwide which the investment manager classifies as sustainable. These are companies that, through the way they are managed and/or the goods and services that they sell, make a positive contribution to the Planet (the environment); and/or People (employee wellbeing; customer wellbeing; healthy, inclusive and connected communities; and/or effective and accountable institutions).

Investment policy

The fund is actively managed and invests at least 80% of its assets in equities of companies worldwide that focus on a range of equity factors (also commonly known as investment styles). Companies will be simultaneously assessed on all targeted equity factors using a fully integrated systematic, bottom-up investment approach. Relevant factors may include the following:

- Low volatility – involves evaluating indicators such as share price movement and historical performance to determine those securities that the investment manager believes will experience smaller price movements than the global equity markets on average.
- Momentum – involves evaluating trends in stocks, sectors or countries within the relevant equity market.
- Quality – involves evaluating indicators such as a company's profitability, stability and financial strength.
- Value – involves evaluating indicators such as cash flows, dividends and earnings to identify securities that the investment manager believes have been undervalued by the market.
- ESG - involves evaluating challenges and opportunities companies face from environmental, social and governance considerations.

The fund maintains a carbon intensity score that is at least 50% lower than the score of its benchmark, the MSCI All Countries World (Net Total Return) index, measured using data from a third-party provider. Carbon intensity is a measure of a portfolio's exposure to companies with high carbon emissions.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently (for more information, please refer to section 6 of Appendix 2 of the prospectus).

The fund invests at least 70% of its portfolio in assets that the investment manager classifies as sustainable. A company is considered to be sustainable if it makes a positive contribution to:

- Planet. This includes contributions to the environment - such as reducing greenhouse gas (GHG) emissions, which helps slow down climate change.

and/or

- People. This includes contributions to one or more of the following:
 - employee wellbeing - such as paying more than living wages or providing training to employees, which supports their professional development and prosperity.
 - customer wellbeing - such as developing new products and services that improve customers' quality of life, for example medical drugs, therapies, diagnostic tools and healthy food.
 - healthy, inclusive and connected communities – such as providing access to clean water and sanitation (which promotes good health).
 - effective and accountable institutions – such as promoting financial stability, which supports people's prosperity and financial security.

A company is classified as sustainable if it achieves a positive score in Schroders' systematic model (SustainEx™). SustainEx™ produces an assessment of the company's effect on a defined set of benefits and costs for people and the planet, which are then combined to calculate an overall sustainability score for the company. A company must achieve a positive score to be deemed sustainable. The model is based on in-depth internal research, which has included establishing the relevance of various factors to the sustainability outcomes referred to above.

In some exceptional cases, SustainEx™ does not provide a fair reflection of a company's contribution to people and/or the planet. The investment manager can refer such companies to Schroders' Sustainable Investment Panel (the Panel), an independent panel of experts.

The fund is not permitted to invest in any assets that conflict with the sustainability objective. The investment manager also engages with selected companies held by the fund on sustainability issues. Please see the fund's Consumer Facing Disclosure, available via <https://www.schroders.com/en-gb/uk/individual/fund-centre> for more details on the investment manager's approach to sustainability.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently (for more information, please refer to section 6 of Appendix I of the Prospectus).

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the MSCI All Countries World (Net Total Return) Index; and compared against the MSCI ACWI ex Fossil Fuels Index.

The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market

conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Sustainable Investing Risk: The fund applies sustainability criteria in its selection of investments. This investment focus may limit the fund's exposure to assets, companies, industries or sectors and the fund may forego investment opportunities that do not align with its sustainability criteria chosen by the investment manager. As investors may differ in their views of what constitutes sustainability, the fund may invest in companies that do not reflect the beliefs or values of any particular investor.

Currency risk: If the fund's investments are denominated in currencies different to the fund's base currency, the fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates. If the investor holds a share class in a different currency to the base currency of the fund, investors may be exposed to losses as a result of movements in currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause

the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.22%
Charges taken from the fund under certain specific conditions	
Performance fee	
None	

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2024 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail unit classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this unit class of the fund is 0.22%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Past performance

Please note that a comparator benchmark was added to this fund on 12 November 2025.

The past performance in the above table is based on the fund's benchmark (Target benchmark: MSCI All Countries World (Net Total Return) Index) in place prior to 12 November 2025.

From 12 November 2025 this table will show performance based on the target benchmark: MSCI All Countries World (Net Total Return) Index; and the new comparator benchmark: MSCI ACWI ex Fossil Fuels Index.

- I Accumulation GBP (GB00BF785732)
- MSCI All Countries World (Net Total Return) Index

Storebrand Global Plus LUX (the “Sub-Fund”) : Share Class B Sterling Acc
a sub-fund of Storebrand SICAV (the “Company”)

ISIN: LU1932671149

The management company is FundRock Management Company S.A.

Objectives and Investment Policy

The Sub-Fund’s objective is to provide its Shareholders with long-term capital growth, through a model based portfolio of equities in global mature economies (developed markets). The Sub-Fund is fossil free and has additional ESG criteria and sustainability focus. The Sub-Fund is actively managed and will seek to reproduce the risk and return profile of the Benchmark, as closely as possible, given its ESG and sustainability properties.

The Sub-Fund seeks to invest in companies that have a high sustainability rating, and refrain from investing in companies with a low rating. The rating is based on an ESG risk rating supplied by a leading independent global provider. This rating is combined with an in-house analysis that ranks companies according to how sustainable their services and products are, and to what extent they operate in line with the UN’s sustainability goals.

The Sub-Fund seeks to invest in companies with a low carbon footprint. The Sub-Fund also refrains from investing in certain sectors, e.g. companies whose main business is the production and/or distribution of fossil fuels. Derivatives may be used to ensure less expensive or more efficient management. Instead, the Sub-Fund may invest more than the Sub-Fund’s Benchmark in companies related to clean energy, energy efficiency, recycling and low-carbon transport. For further information, see section 3 of the Sub-Fund particular 2 of

the prospectus of the Company.

Benchmark index: The MSCI World Index is the Benchmark used for asset allocation and performance comparison purposes.

The Benchmark is chosen to represent the investable universe for the Sub-Fund. The weightings of securities held in the Sub-Fund will typically deviate somewhat from Benchmark weightings. In addition, the Investment Manager can take positions in securities which are not in the Benchmark if they identify a specific investment opportunity. This will result in the Sub-Fund having some tracking error (typically below 2%).

Recommendation: this Sub-Fund may not be appropriate for investors who plan to withdraw their money within less than five years.

Dividends and other income that the Sub-Fund receives will be reinvested in the Sub-Fund.

Investors may redeem their shares on demand.

Sub-Fund shares may be bought on all banking days in Luxembourg. Orders received by 1 p.m. (Luxembourg time) on these days will be processed on the same day.

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The risk and reward category shown is not guaranteed to remain unchanged, and the categorization of the Sub-Fund may shift over time. This indicator measures the risk of price fluctuations. The risk assessment is based on a representative portfolio’s historical volatility calculated using weekly data for the last five years, places the Sub-Fund in category 5. That means that the purchase of units is associated with a moderate to high risk of price fluctuations. The Sub-Fund’s position on the risk scale is not fixed and may vary over time.

The following risks, that are materially relevant to the Sub-Fund, are

not adequately captured by the synthetic indicator:

Equity Investment Risks: The market value of equities may go down as well as up.

Foreign Exchange Risk and Currency Hedging Risk: Changes in currency exchange rates may influence the value of the Sub-Fund.

Liquidity Risk: The Sub-Fund takes a risk of not being able to sell illiquid securities.

Specialization Risk: The Sub-Fund may underperform due to its specific investment approach.

Depository Risk: The Sub-Fund may be unable to recover capital which are held by depository agents and sub-custodians.

Political and Country Risks: The Company’s assets may be affected by political, economic and social changes in countries where investments are made.

Operational Risk: The Sub-Fund may be affected by malfunctioning operational processes with the management company or with its service providers.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	No charge
Exit Charge	No charge
Charges taken from the fund over a year	
On-going Charges	0.29%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The cost is divided equally among all shares and may vary from year to year.

For detailed information about charges, including the performance fee, please refer to the Company's prospectus, section 12.

Past Performance

- The Sub-Fund exists since 24th of June 2019.
- The bar graph shows the Sub-Fund's net return during the past calendar years. All return figures are in GBP after the deduction of charges taken from the Sub-Fund.
- Historical returns are no guarantee for future returns. Future returns will depend on market developments, the Sub-Fund manager's skill, the Sub-Fund's risk profile, ongoing charges and transaction costs. The return may become negative due to negative price developments.
- The Sub-Fund is not designed to track the performance of the index.

Practical Information

- This Key Investor Information document describes a share class of a Sub-Fund within the Company. The prospectus and periodic reports and accounts are prepared for the Company as a whole. The assets and liabilities of each Sub-Fund within the Company are segregated by law.
- Depositary: J.P.Morgan SE, Luxembourg Branch
- Taxation in the Company domicile (Grand Duchy of Luxembourg) may have an impact on the personal tax position of the investor.
- Investors have the right to convert their shares in one class of the Sub-Fund into shares in another class of the Sub-Fund or into shares in another Sub-Fund, provided they meet the minimum requirements as set out in section 8 of the prospectus of the Company. An explanation of how to exercise their rights can be found in the prospectus.
- The up-to-date remuneration policy of the management company, including a description of how remuneration and benefits are determined, is available at <https://www.fundrock.com/policies-and-compliance/remuneration-policy/>. A paper copy is available free of charge from the management company.
- FundRock Management Company S.A. may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Company.
- For further information, including information on the prices of shares, see the Company's prospectus, or go to www.storebrandfunds.com. You can request for information, such as copies of the prospectus, last annual report and half-yearly report, to be sent by mail, free of charge (English language).

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Dynamic Bond Fund ("the Fund") I Accumulation Shares

This is a sub fund of MI TwentyFour Investment Funds. The Fund is an Open Ended Investment Company. ISIN: GB00B5VRV677. Apex Fundrock Ltd is the Authorised Corporate Director of the Fund ("MI" and "MI Funds" are trading names of the ACD).

Objectives and investment policy

The Fund aims to provide income and grow your investment.

The Fund will invest in a broad range of bonds (which are loans that pay a fixed or variable rate of interest) issued by companies or governments from around the world. The Fund has a highly flexible investment policy which allows it to take advantage of current market conditions and future expectations.

The bonds will be 'investment grade' and 'non-investment grade', as determined by international agencies that provide such ratings. Investment grade bonds, whilst potentially producing a lower level of income than non-investment grade bonds, are considered to be lower risk.

The Fund will aim to reduce the effect of exchange rate movements in the underlying securities relative to the base currency of the Fund. However, these techniques may not be fully effective in completely removing the exchange rate risk.

The Fund may use derivative instruments (such as futures, options and interest rate and credit derivatives) for investment purposes. Derivatives are linked to the rise and fall of other assets. The price movements in these assets can result in movements of the Fund's share price.

The Fund can also use derivative instruments for the purposes of efficient portfolio management, with the aim of managing risk and cost.

The investment process of the Fund integrates the consideration of environmental and social factors and is described in more detail in the prospectus.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 4-5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease and increase.
- There is no guarantee that an asset which provides the security for a bond will maintain its value.
- The Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movements. This may result in gains or losses that are greater than the original amount invested.
- Derivatives can be used to help reduce risk but may not be fully successful. Derivatives can also reduce gains you may otherwise have made.
- Currency risk reduction techniques can have an effect on the value of your investment and on the performance of the share class.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
- There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Fund.
- In difficult market conditions, the value of some investments may be less predictable than normal and the Fund may not be able to buy and sell these investments at the best time or at a fair price. This could affect the Fund's performance, potentially reducing your returns.
- For further risk information please see the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.79%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- Switching charge (for switching into the Fund from another fund) 0.05%.
- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charge, the figure is as at 31 March 2025.
- You may also be charged a dilution levy on entry to or exit from the Fund, this is to cover costs associated with your transaction.
- 50% of certain charges are deducted from the capital of the Fund. This may allow more income to be paid but it may also restrict capital growth.
- For more information about charges, please see the prospectus.

Monument Bond Fund ("the Fund") I Accumulation Shares

This is a sub fund of MI TwentyFour Investment Funds. The Fund is an Open Ended Investment Company. ISIN: GB00B3V5V897. Apex Fundrock Ltd is the Authorised Corporate Director of the Fund ("MI" and "MI Funds" are trading names of the ACD).

Objectives and investment policy

The Fund aims to provide a competitive level of income whilst maintaining the capital value of your investment.

The Fund will invest in a range of European and Australian asset-backed securities ("ABS") rated at least BBB- or equivalent at the time of investment. These are bonds (debt securities that pay a floating rate of interest) that are backed by specific pools of financial assets including mortgages and other consumer and corporate debt.

On occasions the Fund may be significantly invested in one particular geographical region.

The Fund will aim to reduce the effect of exchange rate movements in the underlying securities relative to the base currency of the Fund. However, hedging techniques may not be fully effective in completely removing the exchange rate risk.

The Fund may use derivative instruments (such as futures, options and interest rate and credit derivatives) for investment purposes. Derivatives are linked to the rise and fall of other assets. The price movements in these assets can result in movement of the Fund's share price.

Vanguard ESG Screened Developed World All Cap Equity Index Fund (UK) (the "Fund")

A sub-fund of Vanguard Investments Funds ICVC

A GBP Accumulation Shares

ISIN: GB00BLLZQL34

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE Developed All Cap Choice Index (the "Index").
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund attempts to:
 1. Track the performance of the Index by investing in all component shares of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process.
 2. Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Index is constructed from the FTSE Developed All Cap Index (the "Parent Index"). The Parent Index is a market-capitalisation weighted index representing the performance of large, mid and small companies covering developed markets around the world. Market capitalisation is the value of a company's outstanding shares in the market and shows the size of a company. The Index methodology excludes shares of companies from the Parent Index where the Index provider determines that companies are engaged or involved in specific activities of the supply chain for, and / or derive revenue (above thresholds specified by the Index provider and set out in https://fund-docs.vanguard.com/Vanguard_ESG_Scr_Dev_World_All_Cap_Eq_Index_FundUK_Exclusions.pdf)
- from certain activities relating to the following activities: certain specified vice products, non-renewable energy and weapons. It also excludes shares of companies based on certain controversial conduct, which is achieved by excluding companies that meet certain criteria in relation to the United Nations Global Compact Principles regarding labour, human rights, environmental, and anti-corruption standards.
- Where the Index provider has insufficient or no data available to adequately assess a particular company relative to the Exclusion Criteria of the Index, such companies will be excluded from the Index until such time as they may be determined to be eligible by the Index provider.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based

- on the value of a financial asset (such as a share, bond, or currency) or a market index. Derivatives on an index (e.g. swaps, futures) may contain some underlying constituents which may not meet the Exclusion Criteria.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The currency of the share class is GBP.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: <https://fund-docs.vanguard.com/Vanguard-Investments-Funds-ICVC.pdf>

For further information about the objectives and investment policy of the Fund and Vanguard's relationship with the Index provider, please see Appendix 1 and the "Disclaimer" section of the Vanguard Investments Funds ICVC prospectus (the "Prospectus") on our website at https://global.vanguard.com/docs.vanguard.com/SDR_CFD_Vanguard_ESG_Screened_Developed_World_All_Cap_Equity_Index_Fund_UK.pdf Further information on the composition of the Index may be obtained at <https://www.ftserussell.com/products/indices/global-choice> and https://research.ftserussell.com/products/downloads/FTSE_Global_Choice_Index_Series_Ground_Rules.pdf

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the

Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.

- Tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Accuracy risk. There is no assurance that the Index provider will compile the Index accurately or that the Index will be determined, composed or calculated correctly.
- Screening risk. A Fund may track an index which screens out possible investments if they do not meet certain screening criteria. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The relevant Fund may perform differently to other funds, including underperforming funds that do not seek to screen investments in this way.
- Unscheduled rebalancing risk. Apart from scheduled rebalances, the index provider may carry out additional ad hoc rebalances to the Benchmark Index in order for example, to correct an error in the selection of index constituents.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Vanguard FTSE U.K. All Share Index Unit Trust (the "Fund")

GBP Accumulation Units

ISIN: GB00B3X7QG63

Manager: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE All-Share Index (the "Index").
- The Index is a free-float market-capitalisation weighted index representing the performance of all eligible companies listed on the London Stock Exchange's main market, which pass screening for size and liquidity. Free-float means that only shares readily available in the market are included when calculating a company's weight in a given index and excludes locked-in shares (such as those held by governments). Market-capitalisation is the value of a company's outstanding shares in the market and shows the size of a company.
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund attempts to:
 1. Track the performance of the Index by investing in all component shares of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process.
 2. Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based

- on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The currency of the unit class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be reinvested and reflected in the price of units in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Units in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). - The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

Vanguard Global Corporate Bond Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Hedged Accumulation Shares

ISIN: IE00BDFB5M56

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the Bloomberg Global Aggregate Float Adjusted Corporate Index (the "Index").
- The Index includes global corporate bonds with maturities greater than one year. The Index is a multi-currency index that includes bonds from developed and emerging markets issuers within the industrial, utility and financial sectors.
- The Fund attempts to:
 1. Track the performance of the Index by investing in a portfolio of securities that, insofar as possible and practicable, consists of a representative sample of the component securities of the Index.
 2. Remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The base currency of the Fund is USD.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange

rates, where the Fund invests in securities denominated in currencies other than the listing currency, but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, the performance (see "Performance") of this share class is shown against the currency hedged version of the Index.

- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 3 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Subject to certain exceptions set out in the Prospectus, Shares in the Fund can be bought or sold or exchanged on a daily basis (save on certain bank / public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus or in a separate Supplement) by submitting an application in writing. A list of the days on which shares in the Fund cannot be bought or sold is available on <https://fund-docs.vanguard.com/holiday-calendar-vanguard-investment-series-plc-irish-funds.pdf>

For further information about the objectives and investment policy of the Fund, as well as the limited relationship with the Index provider, please see Appendix 1 and Appendix 6 of the Vanguard Investment Series plc prospectus (the "Prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging may be used but is not guaranteed to completely eliminate currency risk.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Vanguard Global Short-Term Bond Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Hedged Accumulation Shares

ISIN: IE00BH65QG55

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the Bloomberg Global Aggregate Ex US MBS 1-5 Year Float Adjusted and Scaled Index (the "Index").
- The Index includes global government, government-related agencies, corporate and securitised bonds, with a maturity between 1 and 5 years. Bloomberg applies a filter to the Index to exclude US Mortgage Backed Securities from the universe of fixed income securities.
- The Fund attempts to:
 1. Track the performance of the Index by investing in a portfolio of securities that, insofar as possible and practicable, consists of a representative sample of the component securities of the Index.
 2. Remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The base currency of the Fund is USD.
- The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to

minimise the risks associated with movements in currency exchange rates, where the Fund invests in securities denominated in currencies other than the listing currency, but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, the performance (see "Performance") of this share class is shown against the currency hedged version of the Index.

- The Fund is appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 3 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging may be used but is not guaranteed to completely eliminate currency risk.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

Vanguard Global Small-Cap Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Accumulation Shares

ISIN: IE00B3X1NT05

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to provide long-term capital growth by tracking the performance of the MSCI World Small Cap Index (the "Index").
- The Index is comprised of small-sized company stocks in developed markets.
- The Fund attempts to:
 - Track the performance of the Index by investing in all constituent securities of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process.
 - Remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The base currency of the Fund is USD.
- The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments.

- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Subject to certain exceptions set out in the Prospectus, Shares in the Fund can be bought or sold or exchanged on a daily basis (save on certain bank / public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus or in a separate Supplement) by submitting an application in writing. Vanguard U.K. Investment Grade Bond Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Accumulation Shares

ISIN: IE00B1S74Q32

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the Bloomberg GBP Non-Government Float Adjusted Bond Index (the "Index").
- The Index is a market-weighted index of pound sterling denominated investment-grade fixed-income securities with maturities greater than one year and a minimum issue size of GBP 200 million, but excluding certain sectors as set out below. The Index includes securities issued by corporate, securitised, and government-related/supranational entities, including non-UK governments who issue securities in pound sterling, but excludes UK Treasury, UK agency and UK local authority issuers.
- The Fund attempts to:
 1. Track the performance of the Index by investing in a portfolio of securities that, insofar as possible and practicable, consists of a representative sample of the component securities of the Index.
 2. Remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The base currency of the Fund is GBP.

- The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 3 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Subject to certain exceptions set out in the Prospectus, Shares in the Fund can be bought or sold or exchanged on a daily basis (save on certain bank / public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus or in a separate Supplement) by submitting an application in writing. A list of the days on which shares in the Fund cannot be bought or sold is available on <https://fund-docs.vanguard.com/holiday-calendar-vanguard-investment-series-plc-irish-funds.pdf>

For further information about the objectives and investment policy of the Fund, as well as the limited relationship with the Index provider, please see Appendix 1 and Appendix 6 of the Vanguard Investment Series plc prospectus (the "Prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
 - Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.12%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their distributor and or adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2024. This figure may vary from year to year. It excludes portfolio transaction costs.

For further information about charges, please see the sections entitled "Buying Shares", "Redeeming Shares", "Fees and Expenses", Appendix 1, and the "Swing Pricing" section in Appendix 2 of the Prospectus on our website at <https://global.vanguard.com>

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Veritas Global Focus Fund (the Fund) – Class A GBP

The Fund is a sub-fund of Veritas Funds plc
Management Company: Waystone Management Company (IE) Limited

ISIN: IE0034106280

Objectives and Investment Policy

The Fund is designed for long-term investors who wish to build capital over a number of years through investment in a focused portfolio of global companies. The Fund is actively managed and is not managed in reference to, or constrained by, any benchmark.

The Fund principally invests in equities, irrespective of specific geographical location listed or traded on Recognised Exchanges throughout the world. Investments may also be made in securities (including convertible bonds with equity linked notes which bonds shall be fixed and/or floating rate and shall generally be investment grade) which are listed or traded on a Recognised Exchange, subject to the Investment Restrictions listed in the Prospectus, although it is not the current intention that such investments will be made. The Fund will not invest in leveraged notes. No consideration will be given to country or global index weightings, nor will the Fund be always fully invested in equities, and as a result performance may be significantly different from that of the markets in which it is invested, or the performance of commonly followed global indices.

Investments in the Fund may include financial derivative instruments. Such instruments may be used to obtain, increase or reduce exposure to underlying assets and may create leverage; therefore their use may result in greater fluctuations of the Net Asset Value of the Fund. The Investment Manager will ensure that the use of derivatives does not materially alter the risk profile of the Fund.

You can buy, sell and switch shares of the Fund on demand on any Business Day as defined in the "Definitions" section of the Fund's Prospectus.

The base currency of the Fund is USD.

It is intended that dividend income will be distributed as set out in the "Dividend Policy" section of the Supplement of the Fund.

Risk and Reward Profile

The Risk and Reward Indicator table shows where this share class ranks in terms of its potential risk and return. The higher the rank, the greater the potential reward but the greater the risk of losing money. It is based upon studies of how such investments have performed in the past and you should note that this share class may well perform differently in the future. The shaded area in the table above shows the share class's ranking on the Risk and Reward Indicator. The lowest category does not mean that a share class is risk free. The table uses a standard calculation method that is used by all EU companies who offer such funds to allow you to compare funds.

Historical data may not be a reliable indication for the future. The rating is not guaranteed to remain the same and the risk/reward category may change over time.

This share class is in a higher risk category because it invests primarily in shares. Shares may offer high long-term growth potential, but the prices of shares fluctuate and often go down as well as up. The Fund may invest in Emerging Market equities which have historically experienced more price volatility than developed markets. In addition, the Fund has a currency risk given that it invests in shares which are priced in different currencies.

The Fund may also be exposed to counterparty risk which could lead to financial loss if a counterparty is unable to meet its contractual obligations. The Fund is also exposed to liquidity risk where there could be insufficient buyers or sellers to trade the underlying holdings.

Recommendation: The Fund is suitable for investors with a long-term time horizon – typically five years.

A more detailed description of risk factors that apply to this Fund is set out in the "Risk Warnings" section of the Supplement.

Charges for this fund

One off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	1.04%
Charges taken from the Fund under specific conditions	
Performance fee	None

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The ongoing charges are based on expenses for the year ending 31.12.2024. This figure may vary from year to year and is based on total expenses for the Fund which are higher than the standard management charge. It excludes portfolio transaction costs and any performance fees.

For more information about charges, please see the "Charges and Expenses" section of the Prospectus and the "Fees" section of the Supplement of the Fund, which is available at www.vamllp.com.

Past performance

The Fund was launched on 31.07.2001. The share class was funded on 16.12.2003. Past performance includes reinvested income. Past performance is calculated in GBP after all ongoing charges. Past performance is not a guide to future performance. Current management fee is 1.00%. Returns based on annual management fee of 0.75% before 25.11.2011. Performance is measured against the MSCI World Index as an indication of market performance for comparison purposes only.
