

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

abrdn Global Government Bond Tracker Fund, a Sterling denominated sub fund of the abrdn OEIC IV, N Acc Shares (ISIN: GB00BLKGX498).
This fund is managed by abrdn Fund Managers Limited..

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

To generate income and some growth over the long term (5 years or more) by tracking the return of the JP Morgan GBI Global Index (Hedged to GBP).
Performance Target: To match the return of the JP Morgan GBI Global Index (Hedged to GBP) (before charges). There is no certainty or promise that the Performance Target will be achieved.
JP Morgan GBI Global Index (Hedged to GBP) (the "Index") is a representative index of the global market for government bonds.

Investment Policy

Portfolio Securities

- The fund will invest at least 90% in government bonds (which are like loans to government that pay interest) that make up the Index.
- The fund may also invest in other funds (including those managed by abrdn), cash and assets that can be turned into cash quickly.
- The Fund can invest 35% or more in bonds issued by a single government.

Management Process

- The management team aims to replicate performance of the Index in deciding which investments are to be included in the portfolio (passive management) and the number and weightings of investments may vary.
- Due to the nature of the passive management process, the fund's performance deviation from the Index is expected to be minimal.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/ or generate additional income or growth consistent with the risk profile of the fund and reduce (hedge) risk related to currency movements on non-sterling bonds
- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset. They can generate returns when the value of these underlying assets rise (long positions) or fall (short positions).
- Derivatives include instruments used to manage expected changes in interest rates, inflation, currencies or creditworthiness of corporations or governments.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future. The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free. The fund is rated as 3 because of the extent to which the following risk factors apply:

- Tracking Error Risk - The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Currency Hedged Indices Risk - Due to timing differences, currency hedging applied to the fund may differ to that of the index. This may mean that the fund's performance deviates from that of the index.
- Credit Risk - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk - The fund invests in securities which can be subject to

price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.

- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income. The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.10%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser. The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking. Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment. The annual report for each financial year will include detail on the exact charges made. The Ongoing Charge figure is as at 12/02/2025. A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus. Further information on the charges can be found in the Prospectus.

PAST PERFORMANCE

abrdrn Global Government Bond Tracker Fund, N Acc Shares, 31 December 2024

Past performance is not a guide to future performance. Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section. Performance is calculated in GBP. The fund was launched in 2020. The share/unit class was launched on 2021.

Baillie Gifford Sustainable Growth Fund - Class B GBP Accumulation

Accumulation Shares - ISIN GB00BYNK7G95

This Fund is a sub-fund of Baillie Gifford Investment Funds II ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to outperform (after deduction of costs) the MSCI ACWI Index, as stated in sterling, by at least 2% per annum over rolling five-year periods by investing (at least 70%) in companies covering a broad range of sustainability topics but whose products or services are creating value for society by addressing significant global challenges.
- In order to be considered as addressing a 'significant global challenge', a company's products or services must be aligned with one or more of the following headline themes: 1) People (the welfare of people), sub-themes may include: enhancing access to healthcare, extending healthy life expectancy; deepening financial inclusion; and delivering essential infrastructure (clean water and sanitation, developing reliable and sustainable infrastructure to support economic development and human wellbeing); 2) Planet (the condition of the planet), sub-themes may include: doing more with less; preserving natural capital; and mitigating and adapting to climate change; and 3) Prosperity (broadening prosperity across society), sub-themes may include: lowering barriers to entrepreneurship; supply chains with integrity; and providing fair and decent work.
- These headline themes and sub-themes align with the United Nations Sustainable Development Goals ("UN SDGs") which serve as a universal blueprint for achieving peace and prosperity for society and the environment. To ensure a company's products or services are meeting the sustainability objective, the Investment Adviser will assess either the revenue or profits derived from the company's products or services.

Policy

- The Fund will invest at least 70% in shares of companies anywhere in the world and of any size and in any sector which, provided the Investment Adviser considers such companies are addressing significant global challenges.

- To meet the sustainability objective, at least 70% of the Fund's assets meet the 'Standard of Sustainability'. A company must demonstrate that a minimum of 30% of either its revenues or profits are derived from products or services that are aligned with a significant global challenge.
- Revenue-based screens are applied that exclude companies with a defined level of activity in certain sectors, details of which are disclosed in the Prospectus.
- The Fund will comply with the Investment Adviser's policy on assessing breaches of the United Nations Global Compact as outlined in its ESG Principles and Guidelines document.
- The Investment Adviser applies its proprietary Alignment Assessment to (a) exclude companies which are causing harm or whose activities conflict with the sustainability objective, (b) inform investment selection for the Fund and (c) identify potential areas for ongoing monitoring and engagement.
- The Fund's portfolio will be managed to align its holding with the goal of net zero greenhouse gas emission by 2050 or sooner.
- The Fund will be actively managed.

Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- Income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.
- The indicator does not take into account the following relevant material risks.
- The Fund is actively managed meaning the Investment Manager selects investments of their own choosing with the aim of achieving the Fund's objectives. This is done without seeking to replicate any index in either of performance or portfolio composition. This investment style, selecting companies with perceived greater long-term growth potential ahead of any short-term returns, in combination with the relative concentration of the Fund, may lead to prolonged periods of underperformance in certain

- market conditions, both in relation to the Fund's benchmark and in absolute terms.
- Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.
 - The Fund's investment policy limits the type of companies it can hold. The Fund may have different returns from funds with no such restrictions.
 - The limitations of third party data, which may be backward looking or estimated, may impact on the Funds ability to achieve any non-financial considerations.
 - In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.
 - Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.
 - You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.
 - Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.
 - For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.54%
Charges taken from the fund under certain specific conditions	
Performance fee	NONE

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charges, the figure is at 30/06/2025.
- Portfolio transaction costs, which are not included in the calculation of the ongoing charges figure but are incurred by the Fund when buying or selling investments, may have an impact on performance and are paid from the assets of the Fund.
- The Ongoing Charges Figure ('OCF') may be lower than previous declarations as a result of a revision to how the indirect fees associated with closed-ended investment companies need to be shown. This does not necessarily mean that fund expenses have gone down rather that we have reverted to how they were calculated until 30 June 2022 to reflect the revised Investment Association's Guidance on Disclosure of Fund Charges and Costs (July 2020, updated January 2022, revised November 2023). A more detailed Costs and Charges disclosure is available upon request.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- You can find further details about the charges in Part 5 of the Prospectus.

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

BlackRock ICS Sterling Liquidity Fund (the “Fund”), **Premier Accu GBP** (the “Share Class”), ISIN: **IE00B43FT809**, is authorised in Ireland and manufactured by BlackRock Asset Management Ireland Limited (the “Manager”) which is part of the BlackRock, Inc group.

The Manager is authorised in Ireland and regulated by the Central Bank of Ireland (the “CBI”) and the CBI is responsible for supervising the Manager in relation to this Key Information Document.

More information is available at www.blackrock.com or by calling **+353 1 612 3393**. This document is dated 09 April 2025.

What is this product?

Type: The Fund is a sub-fund of Institutional Cash Series plc, an umbrella company incorporated in Ireland, authorised by the Central Bank of Ireland as a Undertaking for Collective Investment in Transferable Securities (“UCITS”).

Term: The Fund does not have a fixed term of existence or maturity period but in certain circumstances, as described in the Fund prospectus, the Fund may be unilaterally terminated following written notice to unitholders subject to compliance with the Fund prospectus and applicable regulation.

Objectives

- The Fund aims to maximise income on your investment consistent with maintaining capital and ensuring its underlying assets can easily be bought or sold (in normal market conditions). Money invested in the Fund is not protected or guaranteed.
- The Fund invests in a broad range of high credit quality fixed income securities (such as bonds) and MMIs (i.e. debt securities with short term maturities). It may also invest in deposits with credit institutions (e.g. banks).
- The Fund will take into account environment, social and governance criteria when selecting investments as disclosed in the prospectus. For further details please refer to the prospectus.
- The Fund will limit its investment to assets which have 397 days or less remaining until the full principal must be repaid. The weighted average maturity (i.e. the average length of time to the date when the principal of the asset is to be repaid in full (or, in respect of interest rate notes, the average length of time to the next interest rate reset to a money market rate) of all of the Fund’s assets will be up to 60 days. The weighted average life (i.e. the average length of time to the date when the principal of the assets is to be repaid in full) of all of the Fund’s assets will be up to 120 days.
- The Fund’s assets may be issued or guaranteed by both United Kingdom (UK) and non-UK issuers including governments, government agencies, companies and supranationals and shall always be denominated in Sterling. They will be rated high credit quality (i.e. meet a specified level of credit worthiness) at the time of purchase.
- The Fund is actively managed. The investment manager has discretion to select the Fund’s investments. The Sterling Overnight Index Average Rate (SONIA) should be used by investors to compare the performance of the Fund.
- The Fund is a “Short Term Low Volatility Variable Net Asset Value Money Market Fund” (or LVNAV) as defined by the EU Money Market Funds Regulations. Details of the current credit ratings (if any) attributed to the Fund are available from www.blackrock.com/cash.
- The price of fixed income securities may be affected by changing interest rates which in turn may affect the value of your investment. Fixed income securities prices move inversely to interest rates. Therefore, the market value of fixed income securities may decrease as interest rates increase. The credit rating of an issuing entity will generally affect the yield that can be earned on fixed income securities; the better the credit rating the smaller the yield.
- The return on your investment in the Fund is directly related to the value of the underlying assets of the Fund, less costs (see “What are the costs?” below).
- The relationship between the return on your investment, how it is impacted and the period for which you hold your investment is considered below (see “How long should I hold it and can I take my money out early?”).
- The depositary of the Fund is J.P. Morgan SE – Dublin Branch.
- Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the Institutional Cash Series plc. These documents are available free of charge in English and certain other languages. These can be found, along with other (practical) information, including prices of units, on the BlackRock website at: www.blackrock.com or by calling the International Investor Servicing team on +353 1612 3393.
- Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- Your shares will be denominated in Sterling, the Fund’s base currency.
- You can buy and sell your shares daily. The Fund is valued at multiple valuation points throughout each day in order to offer investors the ability to buy and sell shares at multiple times during the day. The minimum initial investment for this share class is £500,000,000.

Intended retail investor: The Fund is intended for retail investors with the ability to bear losses up to the amount invested in the Fund (see “How long should I hold it and can I take my money out early?”).

Insurance benefits: The Fund does not offer any insurance benefits.

What are the risks and what could I get in return?

Risk Indicator

← Lower risk Higher risk →						
1	2	3	4	5	6	7
 The risk indicator assumes you keep the product for 1 year. The actual risk can vary significantly if you cash in at an early stage and you may get back less.						

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- We have classified this product as 1 out of 7, which is the lowest risk class. This classification rates the potential losses from future performance at a very low level, and poor market conditions could affect the value of your investment. This classification is not guaranteed and may change over time and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.
- Be aware of currency risk.** If you receive payments in a currency that is different to the product's base currency, the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
- Please refer to the product's Prospectus for details of other materially relevant risks that may apply to this product.
- This product does not include any protection from future market performance so you could lose some or all of your investment.
- If the product is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, which may include input from benchmark(s) / proxy, over the last ten years. Markets could develop very differently in the future.

What happens if BlackRock Asset Management Ireland Limited is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary, J.P. Morgan SE – Dublin Branch (the "Depositary"). In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). As a shareholder of the Fund you would not be able to make a claim to the UK Financial Services Compensation Scheme or any other scheme about the Fund in the event that the Fund is unable to pay out.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time: The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0 % annual return).
- GBP 10,000 is invested.

	If you exit after recommended holding period
Total costs	12 GBP

How long should I hold it and can I take money out early? Recommended Holding Period: 1 year

The recommended holding period (RHP) has been calculated in line with the investment strategy of the Fund and the time frame in which it is expected that it will be possible to achieve the investment objective of the Fund. Any investment should be considered against your specific investment needs and appetite for risk. BlackRock has not considered the suitability or appropriateness of this investment for your personal circumstances. If you are in any doubt about the suitability of the Fund to your needs you should seek appropriate professional advice. Details of dealing frequency can be found under "What is this product?". You may receive less than expected if you cash in earlier than the RHP. The RHP is an estimate and must not be taken as a guarantee or an indication of future performance, return or risk levels. Please see the "What are the costs?" section for details of any exit fees.

How can I complain?

iShares ESG Screened Sterling Corporate Bond Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00BN08YZ75

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The aim of the Fund is to provide a return on investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the iBoxx MSCI ESG GBP Non-Gilts Index (the "Index").
- ▶ The pre-defined ESG screens set by the index provider seek to limit and/or exclude from the Index corporate issuers within the iBoxx GBP Non-Gilts Index which are determined by the index provider (often by reference to specific revenue thresholds or to any connection to an activity regardless of any revenue received) as having exposure to, or other ties with, certain activities and involvement in relevant ESG controversies (as further described in the Fund's prospectus).
- ▶ The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so may take into consideration the Index. The Fund invests in fixed income securities (such as bonds) that make up the Index and, at the time of purchase, comply with the credit rating requirements of the Index. The Fund may at times invest indirectly via other fixed income-related investments (i.e. other investments whose value is related to debt) giving exposure to such fixed income securities, or in other fixed income securities not in the Index.
- ▶ The Index measures the performance of fixed income securities denominated in Sterling issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) but excludes gilts (i.e. bonds) issued by the UK government. The fixed income securities will pay income according to a fixed rate of interest and will be investment grade (i.e. meet a specified level of credit worthiness) at the time of inclusion in the Index. They must also have a minimum time to maturity (i.e. the time until they become due for repayment) and a minimum amount outstanding, based on thresholds determined by the index provider.
- ▶ The Fund uses techniques to achieve a similar return to its Index. These techniques may include the strategic selection of certain securities that make up the Index or other fixed income securities which provide similar performance to certain constituent securities. They may also include the use of derivatives (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The Fund may use derivatives for efficient portfolio management purposes (EPM) (i.e. to reduce risk or costs within the Fund's portfolio, or generate additional income). The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income and off-set costs .
Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2024. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*
This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.	
Charges taken from the Fund over each year	
Ongoing Charges	0.11%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2021. The unit class was launched in 2021.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Global Short Fixed Income Lower Carbon ESG Screened Fund
GBP Accumulation Shares (IE000MBVK9Q9)

Manufacturer: Dimensional Ireland Limited
For more information on this product, please call +44 (0)20 3033 3300 or refer to www.dimensional.com.

The Central Bank of Ireland is responsible for supervising Dimensional Ireland Limited in relation to this Key Information Document. The Global Short Fixed Income Lower Carbon ESG Screened Fund ("Fund") is authorised in Ireland and regulated by the Central Bank of Ireland. This Fund is managed by Dimensional Ireland Limited. Dimensional Ireland Limited is authorised in Ireland and regulated by the Central Bank of Ireland. This document was produced on 30 June 2025.

What is this product?

Type:
The Fund is a sub-fund of Dimensional Funds plc, a UCITS authorised by the Central Bank of Ireland.

Term:
This Fund is open-ended.

Objectives:
The aim is to maximise total returns from the universe of debt instruments in which the Fund invests. Total return seeks to generate both income and capital appreciation.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund. The Fund is not managed in reference to a benchmark.

The Fund invests in debt (such as bonds, commercial paper, bank and corporate debt) issued by governmental, quasi-governmental, governmental agency, supranational agency issuers and companies mainly from developed countries which the Investment Manager considers to be consistent with the Fund's strategy of investing in sustainable investments.

The Fund will generally invest in debt which matures within five years. At the time of purchase, the Fund may invest in debt considered investment grade at the time of purchase (e.g., rated BBB- or above by Standard & Poor's Rating Group ("S&P") or Fitch Ratings Ltd. ("Fitch") or Baa3 or above by Moody's Investor's Service, Inc. ("Moody's")). The Fund may invest with an emphasis on debt rated in the lower half of the investment grade spectrum (e.g., rated BBB- to A+ by S&P or Fitch or Baa3 to A1 by Moody's). The Fund may hold more lower quality securities when the Investment Manager believes that the returns warrant such investments. However, it may decrease its level of investment in lower quality securities when the returns and level of risk do not warrant such investment.

The Investment Manager intends to take into account the impact that companies may have on the environment and other sustainability considerations when making investment decisions for the Fund. The Fund will generally exclude or underweight securities of companies that, according to the Fund's sustainability impact considerations, may

be less sustainable as compared to other companies in the Fund's investment universe or companies with similar business lines. Similarly, the Fund will generally be overweight in securities of companies that may be more sustainable as compared either to other companies in the Fund's investment universe or other companies with similar business lines.

The Fund will use financial contracts or instruments (derivatives) in an attempt to protect returns against exchange rate fluctuations between both (i) the currency of your share class and the base currency of the Fund; and (ii) the currency of investments and the base currency of the Fund (hedging).

The Fund may use financial contracts or instruments (derivatives) to manage risk, reduce costs or improve returns.

Fund returns are primarily determined by the returns of the securities the Fund invests in, after fees. The performance of an investment in the Fund will be driven by the performance of the bond markets which the Fund focuses on, by the characteristics that the Fund emphasizes—such as exposure to the credit and term premiums—as well as by implementation costs.

Income is not distributed and is rolled up (accumulated) into the value of your investment.

You may sell your investment in the Fund on demand on a daily basis.

Additional Information: We are required to provide you with further documentation and copies of the prospectus (which includes additional information relating to your investment), the latest annual reports and subsequent half-yearly reports (all in English). This and other information (including the latest share prices) are available free of charge at www.dimensional.com.

Depository: State Street Custodial Services (Ireland) Limited.

Intended retail investor:
The Fund is expected to be suitable for investors seeking to maximise current income while preserving capital. It is recommended the Fund should be purchased with advice, but it is also suitable for retail investors with a basic knowledge of financial investments who can purchase the Fund on an execution only basis. As the Fund's investment return is not guaranteed, investors must be able to bear loss of capital.

What are the risks and what could I get in return?

Risk Indicator

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level and poor market conditions are very unlikely to impact the value of your investment.

Additional risks may include loss of principal and fluctuating value. For more detail about the risks related to this product, please see the prospectus available at www.dimensional.com.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Global Short Fixed Income Lower Carbon ESG Screened Fund supplemented by a suitable benchmark or proxy where the Fund had insufficient history over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended Holding Period: 3 years			
Investment: GBP 10,000			
Scenarios You could lose some or all of your investment.		If you exit after 1 year	If you exit after 3 years (recommended holding period)
Stress	What you might get back after costs Average return each year	9,000 GBP -10.00%	8,950 GBP -3.62%
Unfavourable¹	What you might get back after costs Average return each year	9,190 GBP -8.06%	9,430 GBP -1.94%
Moderate²	What you might get back after costs Average return each year	10,160 GBP 1.62%	10,440 GBP 1.45%
Favourable³	What you might get back after costs Average return each year	10,740 GBP 7.39%	10,720 GBP 2.36%

¹ This type of scenario occurred for an investment between September 2019 and September 2022.

² This type of scenario occurred for an investment between November 2015 and November 2018.

³ This type of scenario occurred for an investment between January 2018 and January 2021.

What happens if Dimensional Ireland Limited is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary, State Street Custodial Services (Ireland) Limited. In the event of the insolvency of Dimensional Ireland Limited, the Fund's assets in the safekeeping of the depositary will not be affected. However, in the event of the depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. The risk is mitigated to a certain extent by the fact the depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud, or intentional failure to properly fulfill its obligations (subject to certain limitations). There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is GBP 10,000.

Investment: GBP 10,000	If you exit after 1 year	If you exit after 3 years
Total costs	25 GBP	78 GBP
Annual cost impact (*)	0.3%	0.3%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.7% before costs and 1.4% after costs.

The illustration is produced using a required methodology (which includes using data from an appropriate proxy where there is insufficient historical data available for the Fund) and provides only a projection, such that it may not accurately predict what the actual annual costs and returns of the Fund will be.

The Commission de Surveillance du Secteur Financier (CSSF) is responsible for supervising the manufacturer, JPMorgan Asset Management (Europe) S.à.r.l., (a member of JPMorgan Chase & Co.) in relation to this Key Information Document.

The Sub-Fund is authorised in Luxembourg and regulated by the CSSF.

THIS DOCUMENT WAS PRODUCED ON 12 MAY 2025

What is this product?

Type

This product is an investment fund. It is organised under Luxembourg law as a société anonyme qualifying as a société d'investissement à capital variable. It is authorised under Part I of the Luxembourg Law of 17 December 2010 and qualifies as an Undertaking for Collective Investments in Transferable Securities (UCITS).

Objectives, Process and Policies

Objective To achieve a return in excess of the benchmark by investing opportunistically in an unconstrained portfolio of debt securities (positively positioned towards Debt Securities with positive E/S characteristics and debt securities issued by companies and countries that demonstrate improving E/S characteristics) and currencies, using derivatives where appropriate. Debt Securities with positive E/S characteristics are those that the Investment Manager believes have been issued by companies and countries that demonstrate effective governance and superior management of environmental and/or social issues (sustainable characteristics).

Investment Process

Investment Approach

- Uses a globally integrated research driven investment process that focuses on analysing fundamental, quantitative and technical factors across countries, sectors and issuers.
- Uses an unconstrained approach to find the best investment ideas across multiple fixed income sectors and countries, with a focus on generating long-term total returns.
- Dynamically shifts among sectors and countries and adjusts duration depending on market conditions.
- Seeks to provide the majority of its returns through Debt Securities with positive E/S characteristics and debt securities issued by companies and countries that demonstrate improving E/S characteristics by incorporating ESG factors and exclusions and positioning the portfolio positively towards issuers with above average ESG scores.

Share Class Benchmark Bloomberg Multiverse Index (Total Return Gross) Hedged to GBP

Benchmark uses and resemblance

- Performance comparison.

The Sub-Fund is actively managed without reference or constraints relative to its benchmark.

Main investment exposure Invested either directly or through derivatives, in a portfolio of debt securities positively positioned towards Debt Securities with positive E/S characteristics and debt securities issued by companies and countries that demonstrate improving E/S characteristics including, but not limited to, debt securities issued by governments and their agencies, state and provincial governmental entities and supranational organisations, corporate debt securities, MBS/ABS, covered bonds and currencies. Issuers may be located anywhere in the world, including emerging markets.

The Sub-Fund is expected to invest up to 30% of its assets in mortgage-backed securities (MBS) and/or asset-backed securities (ABS) of any credit quality, however, due to the unconstrained investment approach, the actual investment level may vary. MBS which may be agency (issued by quasi US government agencies) and non-agency (issued by private institutions) refers to debt securities that are backed by mortgages, including residential and commercial mortgages, and ABS refers to those that are backed by other types of assets such as credit card debt, car loans, consumer loans and equipment leases. The Sub-Fund may have significant exposure to below investment grade securities but will not invest in distressed debt securities (at the time of purchase). The Sub-Fund may hold up to 10% in convertible securities and up to 10% in contingent convertible bonds.

The Sub-Fund may use long and short positions (through derivatives) to vary exposure to countries, sectors, currencies and credit ratings which may be concentrated from time to time.

The Sub-Fund may invest in onshore debt securities issued within the PRC through China-Hong Kong Bond Connect.

The Sub-Fund will typically maintain an average asset-weighted MSCI ESG score above the average MSCI ESG score of the fixed income universe weighted to match the Sub-Fund's sector allocation, excluding cash holdings and currencies. The Sub-Fund's average asset-weighted MSCI ESG score will be calculated as the total of each security's market value by its MSCI ESG score. The average MSCI ESG score of the fixed income universe will be calculated using the ESG scores of relevant industry sector indices, weighted to reflect the sector exposure in the Sub-Fund. The average asset-weighted ESG score will not include those securities held by the Sub-Fund that do not have an MSCI ESG score, such as certain MBS/ABS securities. For those securities without an MSCI ESG score, the majority will be sustainable or demonstrate improving sustainable characteristics as determined by the Investment Manager.

The Sub-Fund excludes certain sectors, companies / issuers or practices from the investment universe based on specific values or norms-based screening policies. These policies set limits or full exclusions on certain industries and companies based on specific ESG criteria and/or minimum standards of business practice based on international norms.

To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. Third party data may be subject to limitations in respect of its accuracy and / or completeness. The exclusions policy for the Sub-Fund can be found on the Management Company's Website

www.jpmmorganassetmanagement.lu. The Investment Manager may invest in certain green bonds where proceeds are directed to the transition to a sustainable economy. As a result, the Sub-Fund may invest in bonds issued by issuers that would otherwise be excluded. The Sub-Fund systematically includes ESG criteria in investment analysis and investment decisions on at least 90% of securities purchased (excluding cash).

The Sub-Fund invests at least 25% of assets in Sustainable Investments, as defined under SFDR, contributing to environmental or social objectives

The Sub-Fund excludes the bottom 20% of corporate debt securities from its investable universe based on its ESG criteria.

The Sub-Fund may invest in Deposits with Credit Institutions, money market instruments and money market funds for investment purposes. The Sub-Fund may hold up to 100% of its assets in these instruments on a temporary basis for defensive purposes.

This Share Class seeks to minimise the effect of currency fluctuations between the Reference Currency of the Sub-Fund (USD) and the Reference Currency of this Share Class (GBP).

Other investment exposure Up to 20% in unrated debt, up to 10% in equities, typically as a result of events relating to its debt holdings such as conversions or restructures; equity derivatives for managing equity exposure and the Sub-Fund's correlation to equity markets. Deposits with Credit Institutions, money market instruments and money market funds for managing cash subscriptions and redemptions as well as current and exceptional payments.

Derivatives Used for: investment purposes; hedging; efficient portfolio management. Types: see [Sub-Fund Derivatives Usage](#) table under [How the Sub-Funds Use Derivatives, Instruments and Techniques](#) in the Prospectus. *TRS including CFD*: none. Global exposure calculation method: absolute VaR. *Expected level of leverage from derivatives*: 250% Indicative only. Leverage may significantly exceed this level from time to time.

Currencies Sub-Fund Base Currency: USD Currencies of asset denomination: any. **Hedging approach:** majority hedged to Base Currency.

Redemption and Dealing Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class normally pays an annual dividend in September based on reportable income. This Share Class intends to qualify as a reporting fund under UK tax law for offshore funds.

SFDR Classification Article 8

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and who understand the risks of the Sub-Fund, including the risk of capital loss, and:

- seek investment return through an unconstrained portfolio of Sustainable Debt Securities and currencies;
- understand the portfolio may have significant exposure to higher risk assets (such as high yield, emerging market debt and MBS/ABS) and are willing to accept those risks in search of potential higher returns;
- seek an investment that embeds ESG principles;
- are looking to use it as part of an investment portfolio and not as a complete investment plan.

Term The product does not have a maturity date. The Board of Directors of the Fund may unilaterally liquidate the product under certain circumstances and the manufacturer would facilitate such a liquidation.

Practical information

Depositary The fund depositary is J.P. Morgan SE - Luxembourg Branch.

Legal Information JPMorgan Asset Management (Europe) S.à r.l. may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus.

JPMorgan Funds consists of separate Sub-Funds, each of which issues one or more Share Classes. This document is prepared for a specific Share Class. The Prospectus and annual and semi-annual financial reports are prepared for JPMorgan Funds.

The Sub-Fund is part of JPMorgan Funds. Under Luxembourg law, there is segregated liability between Sub-Funds. This means that the assets of a Sub-Fund will not be available to meet a claim of a creditor or another third party made against another Sub-Fund.

Switching Investors may switch into Shares of another Share Class (excluding a T Share Class, F Share Class or CPF Share Class) of the Sub-Fund or another Sub-Fund of JPMorgan Funds (excluding Multi-Manager Sub-Funds) subject to meeting any relevant eligibility requirements and minimum holding amounts. Further information can be found in the "Investing in the Sub-Funds" section of the Prospectus.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you. The risk of the product may be significantly higher if held for less than the recommended holding period.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. Beside the risks included in the risk indicator, other risks materially relevant for the product may affect its performance. Please refer to the Prospectus, available free of charge at www.jpmorganassetmanagement.lu.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 2017 and 2022.

Moderate: this type of scenario occurred for an investment between 2019 and 2024.

Favourable: this type of scenario occurred for an investment between 2016 and 2021.

What happens if JPMorgan Asset Management (Europe) S.à r.l. is unable to pay out?

JPMorgan Asset Management (Europe) S.à r.l. is responsible for administration and management of the Fund, and does not hold assets of the Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). JPMorgan Asset Management (Europe) S.à r.l., as the manufacturer of

this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- £ 10,000 is invested.

Example Investment £ 10,000	if you exit after 1 year	if you exit after 5 years (recommended holding period)

Legal & General All Stocks Gilt Index Trust Unit Class C GBP Accumulation - ISIN: GB00BG0QNW27

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE Actuaries UK Conventional Gilts All Stocks Index, the "Benchmark Index" before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
 - The Benchmark Index comprises government or other public bonds (a type of loan that pays interest) issued by the government of the United Kingdom (known as gilts) in accordance with the index provider's methodology.
 - The gilts that the Fund invests in will be investment grade bonds (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index.
 - The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.
 - The Fund may also invest in government or other public bonds issued by the government of the United Kingdom which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index, money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Manager may only hold money market instruments and deposits for liquidity purposes to facilitate the redemption of units and the efficient management of the Fund.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Benchmark Index.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in GBP.
 - This Fund may be suitable for investors looking to invest in bonds issued by the UK government (known as gilts), as represented by the Benchmark Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 6 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The price for buying and selling units is subject to a Dilution Adjustment See opposite.	
Charges taken from the fund over each year	
Ongoing charge	0.08%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2024. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken partly from the income and partly from the capital of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.04% for purchases and 0.08% for sales at 31 December 2024. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1981.
- This unit class launched in 2013.

PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Investor Services Limited.
- You can obtain further information about the Fund including copies of its prospectus and the latest annual and semi-annual reports at www.legalandgeneral.com/reports. Paper copies of these documents are also available free of charge in English from Legal & General Investments, PO Box 6080, Wolverhampton WV1 9RB.

Legal & General Emerging Markets Government Bond (US\$) Index Fund Unit Class C GBP Accumulation - ISIN: GB00BG0QPN75

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the JPMorgan Emerging Markets Bond Index Plus, the "Benchmark Index" before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
 - The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index.
 - The Fund will have at least 80% exposure to assets that are included in the Benchmark Index.
 - The Benchmark Index consists of bonds which are issued in US Dollars by the governments of emerging market countries in accordance with the index provider's methodology.
 - The Fund may invest in sub-investment grade bonds. The bonds that the Fund invests in will be a mixture of both sub-investment grade and investment grade bonds. The mix will closely match that of the Benchmark Index. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time. Sub-investment grade bonds are rated as higher risk and investment grade bonds are rated as lower risk.
 - The Fund may also invest in bonds which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index, money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.

- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports. The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund may invest in countries where investment markets are considered to be less developed. This means that investments are generally riskier than

- those in developed markets because they: (i) may not be as well regulated; (ii) may be more difficult to buy and sell; (iii) may have less reliable arrangements for the safekeeping of investments; or (iv) may be more exposed to political and taxation uncertainties. The value of the Fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short-term.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.

Legal & General Future World ESG Tilted and Optimised Developed Index Fund Unit Class C GBP Accumulation – ISIN: GB00BMFXWS95

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the Solactive L&G Enhanced ESG Developed Markets Index NTR, the "**Benchmark Index**" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Fund seeks to replicate the Benchmark Index as closely as possible and will have at least 90% exposure to its constituents and will generally hold assets directly but can use depositary receipts (such as American depositary receipts and global depositary receipts) to gain exposure when the direct asset cannot be held or is not available.
- The Fund may also invest in shares in companies (directly or indirectly) which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index.
- The Fund may also invest in, money market instruments (including treasury bills), depositary receipts, cash, deposits, and collective investment schemes including those managed or operated by the Manager or an associate of the Manager.
- The Fund may also exclude companies listed on LGIM's Climate Impact Pledge divestment list. This list includes companies, which after certain period of engagement, continue to: (i) not perform well against LGIM's climate assessment; (ii) are unresponsive to engagement recommendations; and/or; fall behind in meeting LGIM's minimum standards. If the tracking deviation limit is exceeded, holdings of companies that are on the Climate Impact Pledge divestment list may be reduced rather than fully divested www.lgim.com/climate-impact-pledge.
- The Benchmark Index is comprised of shares in companies that are incorporated, headquartered or which have their principal business activities in developed countries.
- The Benchmark Index tilts to increase exposure to companies that demonstrate good environmental, social and governance ("ESG") efforts as determined by the Investment Manager's proprietary ESG scoring system ("ESG Scores"). The ESG Score is used as a rules-based approach to scoring companies.
- This means the Fund will invest more in companies with higher ESG Scores, and less in companies with lower ESG Scores. Higher scores indicate more of the Investment Manager's criteria for best practices have been met. Due to data limitations, the Investment Manager may not be able to calculate an ESG score for all companies in the Benchmark Index. In such cases companies will be given a neutral weighting and no tilting based on the ESG Score will be applied. **LGIM ESG Scores**.
- The Benchmark Index aims to reduce its overall greenhouse gases (GHG) emissions intensity in line with a reduction pathway of 7% per year on average, starting from April 2021 ("Index Base Date"). It also aims to keep its GHG Emissions Intensity at least 50% lower than the Parent Index. At each Benchmark Index rebalance, the lower value of these two metrics is used in the optimisation process.
- The Benchmark Index excludes companies on LGIM's Future World Protection List ("FWPL"). This list seeks to align with market practice and client expectations for responsible investment products. Companies on the

FWPL include companies considered as perennial violators of the United Nations Global Compact, certain companies involved in the manufacture and production of controversial weapons, certain companies with involvement in mining and extraction of thermal coal, thermal coal power generation or oil sands, which have not set out a clear plan aligned with the Paris Agreement to phase out thermal coal in accordance with specific criteria. The FWPL methodology sets out the Investment Manager's various assessment criteria, including revenue thresholds. www.lgim.com/fwpl

- The Benchmark Index also excludes companies generating certain levels of revenue from firearms, military weapon system manufacturing, tobacco (both from distribution and production), thermal coal power generation and extraction, adult entertainment (both from production and distribution) and gambling (includes certain supporting products and services to gambling operations) as defined by the Benchmark Index provider.
- The Benchmark Index will be rebalanced twice a year.
- The Fund does not apply a UK sustainability investment label in accordance with the FCA's Sustainability Disclosure Requirements.
- The Fund's Consumer Facing Disclosure, a document which includes details of the key sustainability characteristics and the sustainability metrics for the Fund, can be found on the Manager's website. An up-to-date overview of the Benchmark Index's methodology is available on www.lgim.com/climate-impact-pledge.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.

Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
- Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3pm. This is the time we calculate unit prices for this Fund. If you contact us after 3pm, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in GBP.
- This Fund is designed for investors looking to invest more in shares in companies that demonstrate good environmental, social and governance efforts in developed countries, as represented by the Benchmark Index.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within 5 years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.
- The Fund's base currency is denominated in sterling (GBP).

RISK AND REWARD PROFILE

Further information on the risks of investing in this Fund is contained in the Prospectus available at www.lgim.com.
The risk and reward indicator may not take account of the following risks of investing in the Fund:

Potentially lower rewards Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- Even a Fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

- The Fund has a sustainability and/or ESG focus in its investment process which may i) limit the Fund's exposure to or exclude certain companies, industries or sectors ii) impact the Fund's investment performance compared to other funds that do not apply such criteria and, iii) differ from an investor's own sustainability and/or ESG criteria.
- The Fund invests in securities valued in currencies that are different from the base currency of the Fund. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- Where companies in the Index are excluded from the Fund as a result of the Climate Impact Pledge, this may affect the ability of the manager to closely track the performance of the Index.

CHARGES

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at 30 September 2025. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the income of the Fund.

Other costs:

- **Dilution adjustment:** on any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2019.
- This share class launched in 2020.

PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Investor Services Limited.

- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2019.
- This share class launched in 2020.
- Effective date 2021-01-15, the Fund changed its benchmark index.

Legal & General Global Infrastructure Index Fund Unit Class C GBP Accumulation - ISIN: GB00BF0TZL74

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE Global Core Infrastructure Index, the "Benchmark Index" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
 - The Benchmark Index is comprised of shares in companies with infrastructure core activities in accordance with the index provider's methodology.
 - The Fund seeks to replicate the Benchmark Index and its investments will closely match those that make up the Benchmark Index.
 - The Fund will have at least 90% exposure (directly or through depositary receipts (a certificate issued by a bank representing shares in a foreign company such as American depositary receipts and global depositary receipts)) to assets that are included in the Benchmark Index.
 - The Fund may also invest in money market instruments (such as treasury bills), depositary receipts, cash, deposits, shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Benchmark Index.
 - Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3pm. This is the time we calculate unit prices for this Fund. If you contact us after 3pm, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in GBP.
 - This Fund may be suitable for investors looking to invest in shares in companies with infrastructure as its core activity as represented by the Benchmark Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
 - The Fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
 - Even a fund in the lowest category is not a risk free investment.
 - The value of an investment and any income taken from it is not guaranteed and can go down as well as up; and the investor may get back less than the original amount invested.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports. The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund may invest in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: (i) may not be as well regulated; (ii) may be more difficult to buy and sell; (iii) may have less reliable arrangements for the safekeeping of investments; or (iv) may be more exposed to political and taxation uncertainties. The value of the Fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short-term.
 - Most of the Fund holds investments from a particular market sector, that of companies within the infrastructure industry. Funds like this can be more volatile than funds that invest across many market sectors. This is because the value of the Fund can go up and down more often and by larger amounts than funds that are spread more widely, especially in the short-term.
 - The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
 - We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The price for buying and selling units is subject to a Dilution Adjustment See opposite.	
Charges taken from the fund over each year	
Ongoing charge	0.20%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2024. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the Income of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.11% for purchases and 0.09% for sales at 31 December 2024. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2018.
- This unit class launched in 2018.

Schroder Sustainable Multi-Factor Equity Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited
Class I Accumulation GBP (GB00BF785732)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the MSCI All Countries World (Net Total Return) index (after fees have been deducted) over a three to five year period by investing in equities of companies worldwide which the investment manager classifies as sustainable. These are companies that, through the way they are managed and/or the goods and services that they sell, make a positive contribution to the Planet (the environment); and/or People (employee wellbeing; customer wellbeing; healthy, inclusive and connected communities; and/or effective and accountable institutions).

Investment policy

The fund is actively managed and invests at least 80% of its assets in equities of companies worldwide that focus on a range of equity factors (also commonly known as investment styles). Companies will be simultaneously assessed on all targeted equity factors using a fully integrated systematic, bottom-up investment approach. Relevant factors may include the following:

- Low volatility – involves evaluating indicators such as share price movement and historical performance to determine those securities that the investment manager believes will experience smaller price movements than the global equity markets on average.
- Momentum – involves evaluating trends in stocks, sectors or countries within the relevant equity market.
- Quality – involves evaluating indicators such as a company's profitability, stability and financial strength.
- Value – involves evaluating indicators such as cash flows, dividends and earnings to identify securities that the investment manager believes have been undervalued by the market.
- ESG - involves evaluating challenges and opportunities companies face from environmental, social and governance considerations.

The fund maintains a carbon intensity score that is at least 50% lower than the score of its benchmark, the MSCI All Countries World (Net Total Return) index, measured using data from a third-party provider. Carbon intensity is a measure of a portfolio's exposure to companies with high carbon emissions.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently (for more information, please refer to section 6 of Appendix 2 of the prospectus).

The fund invests at least 70% of its portfolio in assets that the investment manager classifies as sustainable. A company is considered to be sustainable if it makes a positive contribution to:

- Planet. This includes contributions to the environment - such as reducing greenhouse gas (GHG) emissions, which helps slow down climate change.

and/or

- People. This includes contributions to one or more of the following:
 - employee wellbeing - such as paying more than living wages or providing training to employees, which supports their professional development and prosperity.
 - customer wellbeing - such as developing new products and services that improve customers' quality of life, for example medical drugs, therapies, diagnostic tools and healthy food.
 - healthy, inclusive and connected communities – such as providing access to clean water and sanitation (which promotes good health).
 - effective and accountable institutions – such as promoting financial stability, which supports people's prosperity and financial security.

A company is classified as sustainable if it achieves a positive score in Schroders' systematic model (SustainEx™). SustainEx™ produces an assessment of the company's effect on a defined set of benefits and costs for people and the planet, which are then combined to calculate an overall sustainability score for the company. A company must achieve a positive score to be deemed sustainable. The model is based on in-depth internal research, which has included establishing the relevance of various factors to the sustainability outcomes referred to above.

In some exceptional cases, SustainEx™ does not provide a fair reflection of a company's contribution to people and/or the planet. The investment manager can refer such companies to Schroders' Sustainable Investment Panel (the Panel), an independent panel of experts.

The fund is not permitted to invest in any assets that conflict with the sustainability objective. The investment manager also engages with selected companies held by the fund on sustainability issues. Please see the fund's Consumer Facing Disclosure, available via <https://www.schroders.com/en-gb/uk/individual/fund-centre> for more details on the investment manager's approach to sustainability.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently (for more information, please refer to section 6 of Appendix 1 of the Prospectus).

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the MSCI All Countries World (Net Total Return) Index; and compared against the MSCI ACWI ex Fossil Fuels Index.

The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market

conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Sustainable Investing Risk: The fund applies sustainability criteria in its selection of investments. This investment focus may limit the fund's exposure to assets, companies, industries or sectors and the fund may forego investment opportunities that do not align with its sustainability criteria chosen by the investment manager. As investors may differ in their views of what constitutes sustainability, the fund may invest in companies that do not reflect the beliefs or values of any particular investor.

Currency risk: If the fund's investments are denominated in currencies different to the fund's base currency, the fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates. If the investor holds a share class in a different currency to the base currency of the fund, investors may be exposed to losses as a result of movements in currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause

the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.22%
Charges taken from the fund under certain specific conditions	
Performance fee	
None	

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2024 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail unit classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this unit class of the fund is 0.22%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Past performance

Please note that a comparator benchmark was added to this fund on 12 November 2025.

The past performance in the above table is based on the fund's benchmark (Target benchmark: MSCI All Countries World (Net Total Return) Index) in place prior to 12 November 2025.

From 12 November 2025 this table will show performance based on the target benchmark: MSCI All Countries World (Net Total Return) Index; and the new comparator benchmark: MSCI ACWI ex Fossil Fuels Index.

- I Accumulation GBP (GB00BF785732)
- MSCI All Countries World (Net Total Return) Index
- MSCI ACWI ex Fossil Fuels Index

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 25/09/2018.

The shareclass was launched on 25/09/2018.

Storebrand Global Plus LUX (the “Sub-Fund”) : Share Class B Sterling Acc
a sub-fund of Storebrand SICAV (the “Company”)

ISIN: LU1932671149

The management company is FundRock Management Company S.A.

Objectives and Investment Policy

The Sub-Fund’s objective is to provide its Shareholders with long-term capital growth, through a model based portfolio of equities in global mature economies (developed markets). The Sub-Fund is fossil free and has additional ESG criteria and sustainability focus. The Sub-Fund is actively managed and will seek to reproduce the risk and return profile of the Benchmark, as closely as possible, given its ESG and sustainability properties.

The Sub-Fund seeks to invest in companies that have a high sustainability rating, and refrain from investing in companies with a low rating. The rating is based on an ESG risk rating supplied by a leading independent global provider. This rating is combined with an in-house analysis that ranks companies according to how sustainable their services and products are, and to what extent they operate in line with the UN’s sustainability goals.

The Sub-Fund seeks to invest in companies with a low carbon footprint. The Sub-Fund also refrains from investing in certain sectors, e.g. companies whose main business is the production and/or distribution of fossil fuels. Derivatives may be used to ensure less expensive or more efficient management. Instead, the Sub-Fund may invest more than the Sub-Fund’s Benchmark in companies related to clean energy, energy efficiency, recycling and low-carbon transport. For further information, see section 3 of the Sub-Fund particular 2 of

the prospectus of the Company.

Benchmark index: The MSCI World Index is the Benchmark used for asset allocation and performance comparison purposes.

The Benchmark is chosen to represent the investable universe for the Sub-Fund. The weightings of securities held in the Sub-Fund will typically deviate somewhat from Benchmark weightings. In addition, the Investment Manager can take positions in securities which are not in the Benchmark if they identify a specific investment opportunity. This will result in the Sub-Fund having some tracking error (typically below 2%).

Recommendation: this Sub-Fund may not be appropriate for investors who plan to withdraw their money within less than five years.

Dividends and other income that the Sub-Fund receives will be reinvested in the Sub-Fund.

Investors may redeem their shares on demand.

Sub-Fund shares may be bought on all banking days in Luxembourg. Orders received by 1 p.m. (Luxembourg time) on these days will be processed on the same day.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The risk and reward category shown is not guaranteed to remain unchanged, and the categorization of the Sub-Fund may shift over time. This indicator measures the risk of price fluctuations. The risk assessment is based on a representative portfolio’s historical volatility calculated using weekly data for the last five years, places the Sub-Fund in category 5. That means that the purchase of units is associated with a moderate to high risk of price fluctuations. The Sub-Fund’s position on the risk scale is not fixed and may vary over time.

The following risks, that are materially relevant to the Sub-Fund, are

not adequately captured by the synthetic indicator:

Equity Investment Risks: The market value of equities may go down as well as up.

Foreign Exchange Risk and Currency Hedging Risk: Changes in currency exchange rates may influence the value of the Sub-Fund.

Liquidity Risk: The Sub-Fund takes a risk of not being able to sell illiquid securities.

Specialization Risk: The Sub-Fund may underperform due to its specific investment approach.

Depository Risk: The Sub-Fund may be unable to recover capital which are held by depository agents and sub-custodians.

Political and Country Risks: The Company’s assets may be affected by political, economic and social changes in countries where investments are made.

Operational Risk: The Sub-Fund may be affected by malfunctioning operational processes with the management company or with its service providers.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	No charge
Exit Charge	No charge
Charges taken from the fund over a year	
On-going Charges	0.29%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The cost is divided equally among all shares and may vary from year to year.

For detailed information about charges, including the performance fee, please refer to the Company's prospectus, section 12.

Past Performance

- The Sub-Fund exists since 24th of June 2019.
- The bar graph shows the Sub-Fund's net return during the past calendar years. All return figures are in GBP after the deduction of charges taken from the Sub-Fund.
- Historical returns are no guarantee for future returns. Future returns will depend on market developments, the Sub-Fund manager's skill, the Sub-Fund's risk profile, ongoing charges and transaction costs. The return may become negative due to negative price developments.
- The Sub-Fund is not designed to track the performance of the index.

Practical Information

- This Key Investor Information document describes a share class of a Sub-Fund within the Company. The prospectus and periodic reports and accounts are prepared for the Company as a whole. The assets and liabilities of each Sub-Fund within the Company are segregated by law.
- Depositary: J.P.Morgan SE, Luxembourg Branch
- Taxation in the Company domicile (Grand Duchy of Luxembourg) may have an impact on the personal tax position of the investor.
- Investors have the right to convert their shares in one class of the Sub-Fund into shares in another class of the Sub-Fund or into shares in another Sub-Fund, provided they meet the minimum requirements as set out in section 8 of the prospectus of the Company. An explanation of how to exercise their rights can be found in the prospectus.
- The up-to-date remuneration policy of the management company, including a description of how remuneration and benefits are determined, is available at <https://www.fundrock.com/policies-and-compliance/remuneration-policy/>. A paper copy is available free of charge from the management company.
- FundRock Management Company S.A. may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Company.

Monument Bond Fund ("the Fund") L Accumulation Shares

This is a sub fund of MI TwentyFour Investment Funds. The Fund is an Open Ended Investment Company. ISIN: GB00BDD9NG10. Apex Fundrock Ltd is the Authorised Corporate Director of the Fund ("MI" and "MI Funds" are trading names of the ACD).

Objectives and investment policy

The Fund aims to provide a competitive level of income whilst maintaining the capital value of your investment.

The Fund will invest in a range of European and Australian asset-backed securities ("ABS") rated at least BBB- or equivalent at the time of investment. These are bonds (debt securities that pay a floating rate of interest) that are backed by specific pools of financial assets including mortgages and other consumer and corporate debt.

On occasions the Fund may be significantly invested in one particular geographical region.

The Fund will aim to reduce the effect of exchange rate movements in the underlying securities relative to the base currency of the Fund. However, hedging techniques may not be fully effective in completely removing the exchange rate risk.

The Fund may use derivative instruments (such as futures, options and interest rate and credit derivatives) for investment purposes. Derivatives are linked to the rise and fall of other assets. The price movements in these assets can result in movement of the Fund's share price.

The Fund can also use derivative instruments for the purposes of efficient portfolio management, with the aim of managing risk and cost.

The investment process of the Fund integrates the consideration of environmental and social factors and is described in more detail in the prospectus.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 3 because funds of this type have experienced low to medium rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease and increase.
- On occasions the Fund may be significantly invested in particular geographical regions, meaning it will have greater exposure to the market, political and economic risks of those regions than if it was more diversified across a wider number of countries.
- There is no guarantee that an asset which provides the security for a bond will maintain its value.
- The Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movements. This may result in gains or losses that are greater than the original amount invested.
- Derivatives can be used to help reduce risk but may not be fully successful. Derivatives can also reduce gains you may otherwise have made.
- Currency risk reduction techniques can have an effect on the value of your investment and on the performance of the share class.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
- There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Fund.
- In difficult market conditions, the value of some investments may be less predictable than normal and the Fund may not be able to buy and sell these investments at the best time or at a fair price. This could affect the Fund's performance, potentially reducing your returns.
- For further risk information please see the prospectus.

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.39%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- Switching charge (for switching into the Fund from another fund) 0.05%.
- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charge, the figure is as at 30 September 2024.
- You may also be charged a dilution levy on entry to or exit from the Fund, this is to cover costs associated with your transaction.
- 50% of certain charges are deducted from the capital of the Fund. This may allow more income to be paid but it may also restrict capital growth.
- For more information about charges, please see the prospectus.

Product

Product: Vanguard ESG Global Corporate Bond Index Fund (the "Fund") - Institutional Plus GBP Hedged Accumulation Shares IE00BND51310

Vanguard Group (Ireland) Limited ("VGIL")

Call +44 207 489 4305 for more information - <https://global.vanguard.com> - This Key Information Document is dated 16/09/2025.

The Central Bank of Ireland (the "Central Bank") is responsible for supervising VGIL in relation to this Key Information Document.

The Fund is authorised in Ireland and has been registered for sale in other EEA Member States.

VGIL is authorised in EEA Member States and regulated by the Central Bank.

You are about to purchase a Fund that is not simple and may be difficult to understand.

What is this product?

Type: The Fund is a sub-fund of Vanguard Investment Series plc ("VIS"), a UCITS authorised by the Central Bank of Ireland.

Term: The Fund has no fixed maturity date, however it may be terminated in certain circumstances as described in the prospectus of VIS (the "Prospectus") including if the net asset value of the Fund falls below US\$100 million or its equivalent in another currency.

Objectives: The Fund employs a passive management – or indexing – investment approach and seeks to achieve the performance of the Bloomberg MSCI Global Corporate Float Adjusted Bond Screened Index (the "Index").

The Fund invests in a multi-currency portfolio of investment grade corporate fixed-rate bonds from both developed and emerging market issuers that consists of a representative sample of the component securities of the Index.

The Index is constructed from the Bloomberg Global Aggregate Float-Adjusted Corporate Index (the "Parent Index") which represents a similar investment universe which is then screened for certain environmental, social, and governance (i.e. controversy-related) criteria (the "screening criteria"), by Bloomberg as the sponsor of the Index, which is independent of Vanguard.

Through the screening out of bonds issued by corporate issuers from its portfolio based on the potentially detrimental impact of the relevant corporate issuer's conduct or products on society and / or the environment, the Fund promotes certain environmental characteristics and social characteristics relating to social norms and standards.

The Index methodology excludes the bonds of corporate issuers that MSCI determines (a) to be engaged in activities in or involved in specific parts of the supply chain for, and/or (b) derive revenue (above a threshold specified by the Index provider) from, certain business segments of activities related to the following: (i) adult entertainment, (ii) alcohol, (iii) gambling, (iv) tobacco, (v) nuclear weapons, (vi) controversial weapons, (vii) conventional weapons, (viii) civilian firearms, (ix) nuclear power, or (x) fossil fuels (which includes thermal coal, oil, or gas, oil sands, arctic oil or arctic gas). The index provider defines what constitutes "involvement" in each activity. This may be based on percentage of revenue or any connection to a restricted activity regardless of the amount of revenue received, and will relate to specific parts of the supply chain.

The Index excludes the bonds of corporate issuers that have a controversy score of zero as defined by MSCI's ESG controversies assessment framework.

The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange rates, where the Fund invests in securities denominated in currencies other than the listing currency, but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, the performance (see "Performance") of this share class is shown against the currency hedged version of the Index.

Where MSCI has insufficient or no data available to adequately assess a particular corporate issuer relative to the screening criteria of the Index, bonds of such issuer will be excluded from the Index until such time as they will be determined to be eligible by MSCI.

The Fund's investments will, at the time of purchase, comply with the screening criteria, except as otherwise described below or in the

Prospectus. In circumstances where the Fund holds securities which do not adhere to the screening criteria, the Fund may temporarily hold such securities until such time as they cease to form part of the Index and it is possible and practicable (in the investment manager's view) to liquidate the position.

The Fund may also hold fixed-rate government and corporate bonds that are not component securities of the Index, but whose risk and return characteristics closely resemble the risk and return characteristics of constituents of the Index or of the Index as a whole and which, in the case of corporate bonds, meet the screening criteria.

While the Fund is expected to track the Index as closely as possible, it typically will not match the performance of the Index exactly, due to various factors such as expenses to be paid by the Fund and regulatory constraints. Details of these factors and the anticipated tracking error of the Fund are set out in the Prospectus.

The Fund attempts to remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.

The Fund follows a binding and significant ESG integration approach in accordance with the Position-recommendation AMF 2020-03 (available at <https://www.amf-france.org/en/regulation/policy/doc-2020-03>).

The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index. Derivatives on an index (e.g. swaps, futures) may contain some underlying constituents which may not meet the screening criteria.

Subject to certain exceptions set out in the Prospectus, Shares in the Fund can be bought or sold or exchanged on a daily basis (save on certain bank / public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus or in a separate Supplement) by submitting an application in writing. A list of the days on which shares in the Fund cannot be bought or sold is available on

<https://fund-docs.vanguard.com/holiday-calendar-vanguard-investment-series-plc-irish-funds.pdf>

Income from the Fund will be reinvested and reflected in the price of shares in the Fund.

VIS is an umbrella fund with segregated liability between sub-funds. This means that the holdings of the Fund are maintained separately under Irish law from holdings of other sub-funds of VIS and your investment in the Fund will not be affected by any claims against any other sub-fund of VIS.

Intended retail investor: The Fund is available to a wide range of investors seeking access to a portfolio managed in accordance with a specific investment objective and policy.

The VIS depositary is Brown Brothers Harriman Trustee Services (Ireland) Limited.

You can obtain copies of the Prospectus and the latest annual and semi-annual report and accounts for Vanguard Investment Series plc ("VIS"), along with the latest published prices of shares and other practical information on the Fund from Vanguard Investment Series plc c/o Brown Brothers Harriman Fund Administration Services (Ireland) Limited, 30 Herbert Street, Dublin 2, D02 W329, Ireland or from our website at <https://global.vanguard.com>. These documents are available in English only. The documents are available in English and are free of charge.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the Fund for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Fund compared to other Funds. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the Fund's capacity to pay you.

Be aware of currency risk. You may receive payments in a different currency to the base currency of the Fund, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the market risks included in the risk indicator, other risks may affect the Fund, including counterparty, screening, index tracking sampling and rebalancing risks.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

This Fund does not include any protection from future market performance so you could lose some or all of your investment.

The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political events, economic news, company earnings and significant corporate events.

Performance Scenarios

What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 3 years

Example Investment: GBP 10,000

Scenarios		If you exit after 1 year	If you exit after 3 years
Minimum	There is no minimum guaranteed return if you exit before 3 years. You could lose some or all of your investment.	-	-
Stress	What you might get back after costs	GBP 8,020	GBP 7,930
	Average return each year	-19.80%	-7.44%
Unfavourable	What you might get back after costs	GBP 8,170	GBP 8,520
	Average return each year	-18.30%	-5.20%
Moderate	What you might get back after costs	GBP 10,340	GBP 10,770
	Average return each year	3.40%	2.50%
Favourable	What you might get back after costs	GBP 11,240	GBP 11,740
	Average return each year	12.40%	5.49%

The figures shown include all the costs of the Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

This Fund cannot be easily cashed in.

Unfavourable scenario: This type of scenario occurred for an investment using a suitable benchmark between 2021 and 2022.

Moderate scenario: This type of scenario occurred for an investment using a suitable benchmark between 2023 and 2024.

Favourable scenario: This type of scenario occurred for an investment using a suitable benchmark between 2023 and 2024.

What happens if VGIL is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of the insolvency of VGIL, the Fund's assets in the safekeeping of the depositary will not be affected. However, in the event of the depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. This risk is mitigated to a certain extent by the fact the depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure to properly fulfil its obligations (subject to certain limitations).

There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you the Fund may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you invest in the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Fund performs as shown in the moderate scenario

- GBP 10,000 per year is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	GBP 19	GBP 60
Annual cost impact (*)	0.2%	0.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.7 % before costs and 2.5 % after costs.

We may share part of the costs with the person selling you the Fund to cover the services they provide to you. They will inform you of the amount.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	The Fund does not charge an entry fee.	GBP 0
Exit costs	The Fund does not charge an exit fee, but the person selling you the Fund may do so.	GBP 0

Ongoing costs taken each year

Management fees and other administrative or operating costs	0.14% of the value of your investment p.a. This is an estimate based on actual costs over the last year and takes account of any known future changes.	GBP 14
Transaction costs	0.05% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Fund. The actual amount will vary depending on how much we buy and sell.	GBP 5

Incidental costs taken under specific conditions

Performance fees	There is no performance fee for this Fund.	GBP 0
------------------	--	-------

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

The Fund is appropriate for long-term investment. You should have an investment horizon of at least 3 years.

No redemption fees are imposed in respect of redemptions, however, the Fund may use swing pricing in order to mitigate the effects of dilution on a particular Dealing Day.

How can I complain?

A Shareholder who is not satisfied with their experience as an investor in the Fund is entitled to bring a complaint to the Fund in accordance with the applicable complaints handling policy. Should you wish to lodge a complaint about a Vanguard product or our service, please contact: Brown Brothers Harriman Fund Administration Services (Ireland) Limited, 30 Herbert Street, Dublin 2, D02 W329. Vanguard ESG Screened Developed World All Cap Equity Index Fund (UK) (the "Fund")

A sub-fund of Vanguard Investments Funds ICVC

Institutional Plus GBP Accumulation Shares

ISIN: GB00BMC4Z756

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE Developed All Cap Choice Index (the "Index").
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund attempts to:
 1. Track the performance of the Index by investing in all component shares of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process.
 2. Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Index is constructed from the FTSE Developed All Cap Index (the "Parent Index"). The Parent Index is a market-capitalisation weighted index representing the performance of large, mid and small companies covering developed markets around the world. Market capitalisation is the value of a company's outstanding shares in the market and shows the size of a company. The Index methodology excludes shares of companies from the Parent Index where the Index provider determines that companies are engaged or involved in specific activities of the supply chain for, and / or derive revenue (above thresholds specified by the Index provider and set out in https://fund-docs.vanguard.com/Vanguard_ESG_Scr_Dev_World_All_Cap_Eq_Index_FundUK_Exclusions.pdf)
- from certain activities relating to the following activities: certain specified vice products, non-renewable energy and weapons. It also excludes shares of companies based on certain controversial conduct, which is achieved by excluding companies that meet certain criteria in relation to the United Nations Global Compact Principles regarding labour, human rights, environmental, and anti-corruption standards.
- Where the Index provider has insufficient or no data available to adequately assess a particular company relative to the Exclusion Criteria of the Index, such companies will be excluded from the Index until such time as they may be determined to be eligible by the Index provider.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based

- on the value of a financial asset (such as a share, bond, or currency) or a market index. Derivatives on an index (e.g. swaps, futures) may contain some underlying constituents which may not meet the Exclusion Criteria.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The currency of the share class is GBP.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: <https://fund-docs.vanguard.com/Vanguard-Investments-Funds-ICVC.pdf>

For further information about the objectives and investment policy of the Fund and Vanguard's relationship with the Index provider, please see Appendix 1 and the "Disclaimer" section of the Vanguard Investments Funds ICVC prospectus (the "Prospectus") on our website at <https://global.vanguard.com/> and the Fund's Consumer Facing Disclosure on our website at https://fund-docs.vanguard.com/SDR_CFD_Vanguard_ESG_Screened_Developed_World_All_Cap_Equity_Index_Fund_UK.pdf Further information on the composition of the Index may be obtained at <https://www.ftserussell.com/products/indices/global-choice> and https://research.ftserussell.com/products/downloads/FTSE_Global_Choice_Index_Series_Ground_Rules.pdf

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the

Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.

- Tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Accuracy risk. There is no assurance that the Index provider will compile the Index accurately or that the Index will be determined, composed or calculated correctly.
- Screening risk. A Fund may track an index which screens out possible investments if they do not meet certain screening criteria. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The relevant Fund may perform differently to other funds, including underperforming funds that do not seek to screen investments in this way.
- Unscheduled rebalancing risk. Apart from scheduled rebalances, the index provider may carry out additional ad hoc rebalances to the Benchmark Index in order for example, to correct an error in the selection of index constituents.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

Type

The product is a share of the sub-fund Wellington Global Impact Fund (the "Fund") (the "Share Class") which is part of the Umbrella Fund, an open-ended investment company with variable capital (société d'investissement à capital variable) and qualifies as an undertaking for collective investment in transferable securities (UCITS) subject to Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 as amended from time to time.

Term

The Umbrella Fund and the Fund do not have a fixed term or maturity period. Subject to the termination rights of the directors of the Umbrella Fund as set forth in the "Termination of Funds" section of the prospectus of the Umbrella Fund (the "Prospectus"), the Fund cannot be automatically terminated. The management company of the Umbrella Fund (the "Management Company") may not unilaterally terminate the Fund.

Objectives

The Fund seeks long-term total returns.

The Fund has a sustainable objective to seek to understand the world's social and environmental problems and to identify and invest in companies that it believes are addressing these needs in a differentiated way through their core products and services. The Fund through its investments, will seek to improve access to, and the quality of, basic life essentials, reduce inequality and mitigate the effects of climate change. The Fund will be actively managed and seeks to deliver long-term total returns seeking to outperform the MSCI All Country World Index ("the Index") and achieve its objectives by investing primarily in global equities, focusing on companies whose core business, the investment manager of the Fund (the "Investment Manager") believes, aims to generate positive social or environmental change alongside a financial return.

The Fund may hold concentrated positions within an Impact Theme and is expected to have a natural bias towards small to mid-capitalisation companies that are experiencing strong growth. Whilst the Fund will generally be well diversified by country, currency, industry and issuer, it may hold positions that are concentrated in this manner from time to time. The Fund will generally invest in developed countries and may invest up to 40% in emerging and frontier markets.

The Fund will invest in shares and other securities with equity characteristics such as preferred stocks, convertible securities or depository receipts. The Fund may invest either directly or via derivatives.

Derivatives may be used to hedge (manage) risk, for investment purposes (such as gaining exposure to a security) and for managing the Fund more efficiently.

The Index serves as a reference benchmark for performance comparison purposes. Whilst Fund securities may be components of the Index, the Index is not considered during portfolio construction and the Investment Manager will

not manage the extent to which Fund securities differ from the Index. The Index is designed to measure equity market performance of developed and emerging markets.

The Fund will invest at least 90% in companies that are considered Sustainable Investments and contribute to the Fund's primary impact categories of life essentials, human empowerment, and the environment, and within these categories across one or a combination of Impact Themes such as sustainable agriculture and nutrition, clean water and sanitation, health, affordable housing, education and jobs training, financial inclusion, digital divide and cybersecurity, alternative energy, resource stewardship, and resource efficiency. The Investment Manager believes identifying investment opportunities which generate a positive impact requires bottom-up fundamental research, however the Fund also uses screening to ensure certain investments are excluded. A full list of these exclusion can be found in the Fund's pre-contractual disclosure document within the prospectus.

The currency of this Share class is different to the base currency of the Fund and so the performance of the Share class will be subject to the impact of the movement of the exchange rate between the currencies.

Income policy

Any income allocated to the Share Class from the Fund is reinvested.

Dealing frequency

Shares can be bought or sold daily in accordance with the prospectus of the Umbrella Fund (the "Prospectus"). The base currency of the Fund is USD.

Intended retail investor

The Fund is intended for basic retail investors with a long-term investment horizon seeking capital appreciation and who are able to bear capital loss. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio. An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Conversions

You may convert your shares into shares of another class / compartment of the Umbrella Fund provided that you meet the criteria for investment in that other class. No conversion charge will be charged by the Fund, but, you may be charged a fee by your advisor or financial intermediary. These third party costs are not reflected below. You can find further information about your right to convert in the Prospectus.

Depository

State Street Custodial Services (Ireland) Limited (the "Depository").

What are the risks and what could I get in return?

Risk Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 4 out of 7 which is a medium risk class. This rates the potential losses from future performance at a medium level. Poor market conditions could affect the value of your investment.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for full details about any other risks materially relevant to the fund not included in the summary risk indicator such as liquidity, sustainability and operational risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example Investment:		5 years 10 000 GBP	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	1 700 GBP	3 220 GBP
	Average return each year	-83.00%	-20.28%
Unfavourable	What you might get back after costs	8 470 GBP	9 810 GBP
	Average return each year	-15.30%	-0.38%
Moderate	What you might get back after costs	11 110 GBP	16 000 GBP
	Average return each year	11.10%	9.86%
Favourable	What you might get back after costs	15 280 GBP	23 280 GBP
	Average return each year	52.80%	18.41%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2021 and 2024.

Moderate scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2017 and 2022.

Favourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2016 and 2021.

What happens if Wellington Luxembourg S.à r.l. is unable to pay out?

The assets of the Fund are held in safekeeping by the Depositary. In the event of the insolvency of the Management Company, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations).

There is no compensation or guarantee scheme protecting you from a default of the Depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the 5 year holding period we have assumed the product performs as shown in the moderate scenario

- 10 000 GBP

	If you exit after 1 year	If you exit after 5 years
Total costs	102 GBP	755 GBP
Annual cost impact (*)	1.0%	1.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.9 % before costs and 9.9 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge. This person will inform you of the actual distribution fee.

Composition of Costs
